Manufacturer Disclosure Statement for Medical Device Security -- MDS2

Edan Instruments, In SL18A

091-0288-00 Rev A

4-Aug-2022

Question ID	Question		See note
DOC-1	Manufacturer Name	Edan Instruments, Inc.	
DOC-2	Device Description	Electrocardiograph	—
DOC-3	Device Model	SL18A	—
DOC-4	Document ID	091-0288-00 Rev A	—
DOC-5	Manufacturer Contact Information	berlin.wang@edan.com	—
		SL18A can communicate ECG	—
		measurement data between	
		device and EDAN's SE-1515 PC	
	Intended use of device in network-connected	ECG or data management	
DOC-6	environment:	software.	
DOC-7	Document Release Date	8/4/2022	
	Coordinated Vulnerability Disclosure: Does the		
	manufacturer have a vulnerability disclosure		
DOC-8	program for this device?	No	
	ISAO: Is the manufacturer part of an Information		
DOC-9	Sharing and Analysis Organization? Diagram: is a network or data flow diagram	No	_
	available that indicates connections to other		
DOC-10	system components or expected external resources?	Available upon request	
000-10	SaMD: Is the device Software as a Medical	Available upon request	—
DOC-11	Device (i.e. software-only, no hardware)?	No	
DOC-11.1	Does the SaMD contain an operating system?	N/A	—
000-11.1	Does the SaMD rely on an owner/operator	IVA	—
	provided operating system?		
DOC-11.2		N/A	
	Is the SaMD hosted by the manufacturer?		
DOC-11.3		N/A	
DOC-11.4	Is the SaMD hosted by the customer?	N/A	
		Yes, No,	
		N/A, or

	Does the device allow personally identifiable	
	information records be stored in a separate	
	location from the device's operating system (i.e.	
	secondary internal drive, alternate drive partition,	
MPII-2.9	or remote storage location)?	Yes
	Does the device have mechanisms used for the	
	transmitting, importing/exporting of personally	
MPII-3	identifiable information?	Yes
	Does the device display personally identifiable	
MPII-3.1	information (e.g., video display, etc.)?	Yes
	Does the device generate hardcopy reports or	
	images containing personally identifiable	
MPII-3.2	information?	Yes
	Does the device retrieve personally identifiable	
	information from or record personally identifiable	
	information to removable media (e.g., removable-	
	HDD, USB memory, DVD-R/RW,CD-R/RW, tape,	
MPII-3.3	CF/SD card, memory stick, etc.)?	Yes
	Does the device transmit/receive or import/export	
	personally identifiable information via dedicated	
	cable connection (e.g., RS-232, RS-423, USB,	
MPII-3.4	FireWire, etc.)?	No
	Does the device transmit/receive personally	
	identifiable information via a wired network	
MPII-3.5	connection (e.g., RJ45, fiber optic, etc.)?	Yes
	Does the device transmit/receive personally	
	identifiable information via a wireless network	
	connection (e.g., WiFi, Bluetooth, NFC, infrared,	
MPII-3.6	cellular, etc.)?	Yes
	Does the device transmit/receive personally	
	identifiable information over an external network	
MPII-3.7	(e.g., Internet)?	No
	Does the device import personally identifiable	
MPII-3.8	information via scanning a document?	No
	Does the device transmit/receive personally	
MPII-3.9	identifiable information via a proprietary protocol?	Yes
	Does the device use any other mechanism to	
	transmit, import or export personally identifiable	
MPII-3.10	information?	No
Management of P	rivate Data notes:

_	

AUTOMATIC LOGOFF (ALOF) The device's ability to prevent access and

Can the device be configured to force reauthorization of logged-in user(s) after a predetermined length of inactivity (e.g., autologoff, session lock, password protected screen

Is the length of inactivity time before autologoff/screen lock user or administrator

for a period of time.

saver)?

configurable?

ALOF-1

ALOF-2

misuse by unauthorized users if device is left idle

AUDIT CONTROLS (AUDT)

	The ability to reliably audit activity on the device.	
	Can the medical device create additional audit	
	logs or reports beyond standard operating system	
AUDT-1	logs?	No
AUDT-1.1	Does the audit log record a USER ID?	N/A
	Does other personally identifiable information	
AUDT-1.2	exist in the audit trail?	N/A
	Are events recorded in an audit log? If yes,	
	indicate which of the following events are	
AUDT-2	recorded in the audit log:	No
AUDT-2.1	Successful login/logout attempts?	N/A
AUDT-2.2	Unsuccessful login/logout attempts?	N/A
AUDT-2.3	Modification of user privileges?	N/A

No

N/A

091-0288-00 Rev A

AUDT-2.4	Creation/modification/deletion of users?	N/A
	Presentation of clinical or PII data (e.g. display,	
AUDT-2.5	print)?	N/A
AUDT-2.6	Creation/modification/deletion of data?	N/A
	Import/export of data from removable media (e.g.	
AUDT-2.7	USB drive, external hard drive, DVD)?	N/A
	Receipt/transmission of data or commands over a	
AUDT-2.8	network or point-to-point connection?	N/A
AUDT-2.8.1	Remote or on-site support?	N/A
	Application Programming Interface (API) and	
AUDT-2.8.2	similar activity?	N/A
AUDT-2.9	Emergency access?	N/A
AUDT-2.10	Other events (e.g., software updates)?	N/A
AUDT-2.11	Is the audit capability documented in more detail?	N/A
	Can the owner/operator define or select which	
AUDT-3	events are recorded in the audit log?	No
	Is a list of data attributes that are captured in the	
AUDT-4	audit log for an event available?	No
AUDT-4.1	Does the audit log record date/time?	N/A
	Can date and time be synchronized by Network	
AUDT-4.1.1	Time Protocol (NTP) or equivalent time source?	N/A
AUDT-5	Can audit log content be exported?	No
AUDT-5.1	Via physical media?	N/A
	Via IHE Audit Trail and Node Authentication	
AUDT-5.2	(ATNA) profile to SIEM?	N/A
	Via Other communications (e.g., external service	
AUDT-5.3	device, mobile applications)?	N/A
	Are audit logs encrypted in transit or on storage	
AUDT-5.4	media?	N/A
	Can audit logs be monitored/reviewed by	
AUDT-6	owner/operator?	No
AUDT-7	Are audit logs protected from modification?	No
AUDT-7.1	Are audit logs protected from access?	No
AUDT-8	Can audit logs be analyzed by the device?	No

AUTHORIZATION (AUTH)

	The ability of the device to determine the authorization of users.	
AUTH-1	Does the device prevent access to unauthorized users through user login requirements or other mechanism?	N
AUTTET	Can the device be configured to use federated credentials management of users for	
AUTH-1.1	authorization (e.g., LDAP, OAuth)? Can the customer push group policies to the	N
AUTH-1.2	device (e.g., Active Directory)?	N
AUTH-1.3	Are any special groups, organizational units, or group policies required?	N
AUTH-2	Can users be assigned different privilege levels based on 'role' (e.g., user, administrator, and/or service. etc.)?	N
AUTH-2	Can the device owner/operator grant themselves unrestricted administrative privileges (e.g.,	IN
AUTH-3	access operating system or application via local root or administrator account)? Does the device authorize or control all API	N
AUTH-4	access requests?	N
AUTH-5	Does the device run in a restricted access mode, or 'kiosk mode', by default?	N

Mo — N/A — N/A — N/A — N/A — N/A — No —

CYBER SECURITY PRODUCT UPGRADES (CSUP)

The ability of on-site service staff, remote service staff, or authorized customer staff to install/upgrade device's security patches.

091-0288-00 Rev A

4-Aug-2022

	Does the device contain any software or firmware which may require security updates during its operational life, either from the device	
	manufacturer or from a third-party manufacturer	
	of the software/firmware? If no, answer "N/A" to	
CSUP-1	questions in this section.	Yes
CSUP-2	Does the device contain an Operating System? If yes, complete 2.1-2.4.	Yes
C30F-2	Does the device documentation provide	
	instructions for owner/operator installation of	
CSUP-2.1	patches or software updates?	Yes
	Does the device require vendor or vendor-	
	authorized service to install patches or software	
CSUP-2.2	updates?	Yes
	Does the device have the capability to receive	
	remote installation of patches or software	No
CSUP-2.3	updates? Does the medical device manufacturer allow	
	security updates from any third-party	
	manufacturers (e.g., Microsoft) to be installed	
CSUP-2.4	without approval from the manufacturer?	No
	Does the device contain Drivers and Firmware? If	
CSUP-3	yes, complete 3.1-3.4.	Yes
	Does the device documentation provide	
	instructions for owner/operator installation of	Vee
CSUP-3.1	patches or software updates? Does the device require vendor or vendor-	Yes
	authorized service to install patches or software	
CSUP-3.2	updates?	Yes
	Does the device have the capability to receive	
	remote installation of patches or software	
CSUP-3.3	updates?	No
	Does the medical device manufacturer allow	
	security updates from any third-party	
CSUP-3.4	manufacturers (e.g., Microsoft) to be installed without approval from the manufacturer?	No
C30F-3.4	Does the device contain Anti-Malware Software?	
CSUP-4	If yes, complete 4.1-4.4.	No
	Does the device documentation provide	
	instructions for owner/operator installation of	
CSUP-4.1	patches or software updates?	N/A
	Does the device require vendor or vendor-	
CSUP-4.2	authorized service to install patches or software updates?	N/A
0001 -4.2	Does the device have the capability to receive	
	remote installation of patches or software	
CSUP-4.3	updates?	N/A
	Does the medical device manufacturer allow	
	security updates from any third-party	
	manufacturers (e.g., Microsoft) to be installed	N1/A
CSUP-4.4	without approval from the manufacturer? Does the device contain Non-Operating System	N/A
	commercial off-the-shelf components? If yes,	
CSUP-5	complete 5.1-5.4.	No
	Does the device documentation provide	
	instructions for owner/operator installation of	
CSUP-5.1	patches or software updates?	N/A
	Does the device require vendor or vendor-	
	authorized service to install patches or software	N/A
CSUP-5.2	updates? Does the device have the capability to receive	N/A
	remote installation of patches or software	
CSUP-5.3	updates?	N/A
	Does the medical device manufacturer allow	—
	security updates from any third-party	
	manufacturers (e.g., Microsoft) to be installed	
CSUP-5.4	without approval from the manufacturer?	N/A

CSUP-8	software updates?	
0001 0	Does the manufacturer have an approved list of	-1
	third-party software that can be installed on the	
CSUP-9	device?	1
	Can the owner/operator install manufacturer-	
	approved third-party software on the device	
CSUP-10	themselves?	N
	Does the system have mechanism in place to	
CSUP-10.1	prevent installation of unapproved software?	N/
	Does the manufacturer have a process in place	
CSUP-11	to assess device vulnerabilities and updates?	Y
	Does the manufacturer provide customers with	
CSUP-11.1	review and approval status of updates?	Ν
CSUP-11.2	Is there an update review cycle for the device?	No

HEALTH DATA DE-IDENTIFICATION (DIDT)

	The ability of the device to directly remove information that allows identification of a person.		
	Does the device provide an integral capability to		
DIDT-1	de-identify personally identifiable information?	Yes	
	Does the device support de-identification profiles		
	that comply with the DICOM standard for de-		
DIDT-1.1	identification?	N/A	

DATA BACKUP AND DISASTER **RECOVERY (DTBK)**

	The ability to recover after damage or destruction of device data, hardware, software, or site configuration information.	
	Does the device maintain long term primary	
DTBK-1	storage of personally identifiable information / patient information (e.g. PACS)?	No
	Does the device have a "factory reset" function to restore the original device settings as provided by	
DTBK-2	the manufacturer?	Yes
DIDK-2		res
DTBK-3	Does the device have an integral data backup capability to removable media?	Yes
	Does the device have an integral data backup	
DTBK-4	capability to remote storage?	Yes
	Does the device have a backup capability for	
DTBK-5	system configuration information, patch restoration, and software restoration?	Yes
DIDK-0		165
DTDK 0	Does the device provide the capability to check	Nie
DTBK-6	the integrity and authenticity of a backup?	No

EMERGENCY ACCESS (EMRG)

No

HEALTH DATA INTEGRITY AND AUTHENTICITY (IGAU)

	How the device ensures that the stored data on the device has not been altered or destroyed in a non-authorized manner and is from the originator.	
IGAU-1	Does the device provide data integrity checking mechanisms of stored health data (e.g., hash or digital signature)?	No
	Does the device provide error/failure protection and recovery mechanisms for stored health data	м.
IGAU-2	(e.g., RAID-5)?	NO

_

MALWARE DETECTION/PROTECTION (MLDP)

	The ability of the device to effectively prevent, detect and remove malicious software (malware).	
MLDP-1	Is the device capable of hosting executable software? Does the device support the use of anti-malware software (or other anti-malware mechanism)?	Yes
MLDP-2	Provide details or reference in notes. Does the device include anti-malware software by	Yes
MLDP-2.1	default?	Yes
MLDP-2.2	Does the device have anti-malware software available as an option? Does the device documentation allow the	No
MLDP-2.3	owner/operator to install or update anti-malware software? Can the device owner/operator independently (re-	No
MLDP-2.4)configure anti-malware settings? Does notification of malware detection occur in	No
MLDP-2.5	the device user interface? Can only manufacturer-authorized persons repair	No
MLDP-2.6	systems when malware has been detected?	Yes
MLDP-2.7	Are malware notifications written to a log?	No
	Are there any restrictions on anti-malware (e.g.,	
MLDP-2.8	purchase, installation, configuration, scheduling)? If the answer to MLDP-2 is NO, and anti-malware	No
MLDP-3	cannot be installed on the device, are other compensating controls in place or available? Does the device employ application whitelisting that restricts the software and services that are	N/A
MLDP-4	permitted to be run on the device?	Yes
MLDP-5	Does the device employ a host-based intrusion detection/prevention system? Can the host-based intrusion	Yes
MLDP-5.1	detection/prevention system be configured by the customer?	No
MLDP-5.2	Can a host-based intrusion detection/prevention system be installed by the customer?	No

NODE AUTHENTICATION (NAUT)

The ability of the device to authenticate communication partners/nodes.

091-0288-00 Rev A

4-Aug-2022

SL18A		

	Does the device provide/support any means of node authentication that assures both the sender and the recipient of data are known to each other and are authorized to receive transferred	
NAUT-1	information (e.g. Web APIs, SMTP, SNMP)?	No
	Are network access control mechanisms	
	supported (E.g., does the device have an internal	
NAUT-2	firewall, or use a network connection white list)?	Yes
	Is the firewall ruleset documented and available	
NAUT-2.1	for review?	Yes
	Does the device use certificate-based network	
NAUT-3	connection authentication?	Yes

ate-based network	Yes	
	Yes	

CONNECTIVITY CAPABILITIES (CONN)

	All network and removable media connections must be considered in determining appropriate security controls. This section lists connectivity capabilities that may be present on the device.	
	Does the device have hardware connectivity	
CONN-1	capabilities?	Yes
CONN-1.1	Does the device support wireless connections?	Yes
CONN-1.1.1	Does the device support Wi-Fi?	Yes
CONN-1.1.2	Does the device support Bluetooth?	No
	Does the device support other wireless network	
CONN-1.1.3	connectivity (e.g. LTE, Zigbee, proprietary)?	No
	Does the device support other wireless	
	connections (e.g., custom RF controls, wireless	
CONN-1.1.4	detectors)?	No
CONN-1.2	Does the device support physical connections?	Yes
	Does the device have available RJ45 Ethernet	
CONN-1.2.1	ports?	Yes
CONN-1.2.2	Does the device have available USB ports?	Yes
	Does the device require, use, or support	
CONN-1.2.3	removable memory devices?	Yes
	Does the device support other physical	
CONN-1.2.4	connectivity?	Yes
	Does the manufacturer provide a list of network	
CONN-2	ports and protocols that are used or may be used on the device?	No
CONN-2	Can the device communicate with other systems	NU
CONN-3	within the customer environment?	Yes
	Can the device communicate with other systems	100
	external to the customer environment (e.g., a	
CONN-4	service host)?	No
CONN-5	Does the device make or receive API calls?	No
	Does the device require an internet connection	
CONN-6	for its intended use?	No
	Does the device support Transport Layer Security	
CONN-7	(TLS)?	Yes
CONN-7.1	Is TLS configurable?	Yes
	Does the device provide operator control	
	functionality from a separate device (e.g.,	
CONN-8	telemedicine)?	No

—	

PERSON AUTHENTICATION (PAUT)

	The ability to configure the device to authenticate users.	
PAUT-1	Does the device support and enforce unique IDs and passwords for all users and roles (including service accounts)?	No
	Does the device enforce authentication of unique IDs and passwords for all users and roles	
PAUT-1.1	(including service accounts)?	No
	Is the device configurable to authenticate users	
	through an external authentication service (e.g.,	
PAUT-2	MS Active Directory, NDS, LDAP, OAuth, etc.)?	No

_
_

091-0288-00 Rev A

4-Aug-2022

	Is the device configurable to lock out a user after		
	a certain number of unsuccessful logon		
PAUT-3	attempts?	No	
FAUT-5	•	NO	_
	Are all default accounts (e.g., technician service		
	accounts, administrator accounts) listed in the	N1/A	
PAUT-4	documentation?	N/A	
PAUT-5	Can all passwords be changed?	Yes	
	Is the device configurable to enforce creation of		
	user account passwords that meet established		
PAUT-6	(organization specific) complexity rules?	No	
	Does the device support account passwords that		
PAUT-7	expire periodically?	No	
	Does the device support multi-factor		
PAUT-8	authentication?	No	
PAUT-9	Does the device support single sign-on (SSO)?	No	
	Can user accounts be disabled/locked on the		
PAUT-10	device?	N/A	
PAUT-11	Does the device support biometric controls?	No	
	Does the device support physical tokens (e.g.		
PAUT-12	badge access)?	No	
	Does the device support group authentication		
PAUT-13	(e.g. hospital teams)?	No	
	Does the application or device store or manage		
PAUT-14	authentication credentials?	No	
PAUT-14.1	Are credentials stored using a secure method?	N/A	
FA01-14.1	Are dedentials stored using a secure method?		

PHYSICAL LOCKS (PLOK)

	Physical locks can prevent unauthorized users with physical access to the device from compromising the integrity and confidentiality of personally identifiable information stored on the device or on removable media	
PLOK-1	Is the device software only? If yes, answer "N/A" to remaining questions in this section.	No
PLOK-1	0 1	
	Are all device components maintaining personally identifiable information (other than removable	
	media) physically secure (i.e., cannot remove	
PLOK-2	without tools)?	Yes
T LOIX 2	Are all device components maintaining personally	
	identifiable information (other than removable	
	media) physically secured behind an individually	
PLOK-3	keyed locking device?	No
	Does the device have an option for the customer	
	to attach a physical lock to restrict access to	
PLOK-4	removable media?	No

ROADMAP FOR THIRD PARTY COMPONENTS IN DEVICE LIFE CYCLE (RDMP)

	Manufacturer's plans for security support of third- party components within the device's life cycle.	
RDMP-1	Was a secure software development process, such as ISO/IEC 27034 or IEC 62304, followed during product development?	Y
RDMP-2	Does the manufacturer evaluate third-party applications and software components included in the device for secure development practices?	Y
	Does the manufacturer maintain a web page or other source of information on software support	
RDMP-3	dates and updates? Does the manufacturer have a plan for managing	N
RDMP-4	third-party component end-of-life?	Y

SOFTWARE BILL OF MATERIALS (SBoM)

SBOM-3

SBOM-4

SAHD-10

Edan Instruments, In SL18A

091-0288-00 Rev A

4-Aug-2022

	A Software Bill of Material (SBoM) lists all the software components that are incorporated into the device being described for the purpose of operational security planning by the healthcare delivery organization. This section supports controls in the RDMP section.
SBOM-1	Is the SBoM for this product available?
	Does the SBoM follow a standard or common
SBOM-2	method in describing software components?
SBOM-2.1	Are the software components identified?
	Are the developers/manufacturers of the software
SBOM-2.2	components identified?
	Are the major version numbers of the software
SBOM-2.3	components identified?
	Are any additional descriptive elements
SBOM-2.4	identified?

Yes	-
Yes Yes	_
	_
Yes	_
Yes	—
Yes	—
No	
Yes	

SYSTEM AND APPLICATION HARDENING (SAHD)

Does the device include a command or process method available to generate a list of software

components installed on the device?

Is there an update process for the SBoM?

The device's inherent resistance to cyber attacks and malware.

	and maiware.	
SAHD-1	Is the device hardened in accordance with any industry standards?	No
SAND-1	Has the device received any cybersecurity	INO
SAHD-2	certifications?	No
	Does the device employ any mechanisms for	
SAHD-3	software integrity checking	No
	Does the device employ any mechanism (e.g.,	
	release-specific hash key, checksums, digital signature, etc.) to ensure the installed software is	
SAHD-3.1	manufacturer-authorized?	No
0/110 0.1	Does the device employ any mechanism (e.g.,	
	release-specific hash key, checksums, digital	
	signature, etc.) to ensure the software updates	
SAHD-3.2	are the manufacturer-authorized updates?	No
	Can the owner/operator perform software integrity	
SAHD-4	checks (i.e., verify that the system has not been modified or tampered with)?	No
SAND-4	Is the system configurable to allow the	NU
	implementation of file-level, patient level, or other	
SAHD-5	types of access controls?	Yes
	Does the device provide role-based access	
SAHD-5.1	controls?	No
····- ·	Are any system or user accounts restricted or	
SAHD-6	disabled by the manufacturer at system delivery?	N/A
SAHD-6.1	Are any system or user accounts configurable by the end user after initial configuration?	N/A
3AHD-0.1	Does this include restricting certain system or	IN/A
	user accounts, such as service technicians, to	
SAHD-6.2	least privileged access?	N/A
	Are all shared resources (e.g., file shares) which	
	are not required for the intended use of the	
SAHD-7	device disabled?	Yes
	Are all communication ports and protocols that	
SAHD-8	are not required for the intended use of the device disabled?	Yes
SAILD-0	Are all services (e.g., telnet, file transfer protocol	165
	[FTP], internet information server [IIS], etc.),	
	which are not required for the intended use of the	
SAHD-9	device deleted/disabled?	Yes
	Are all applications (COTS applications as well	
	as OS-included applications, e.g., MS Internet	
	Explorer etc.) which are not required for the	

Explorer, etc.) which are not required for the

intended use of the device deleted/disabled?

Yes

_		
_		

091-0288-00 Rev A

4-Aug-2022

	Can the device prohibit boot from uncontrolled or removable media (i.e., a source other than an internal drive or memory component)?	Yes	
	Can unauthorized software or hardware be installed on the device without the use of physical tools?	No	_
	Does the product documentation include information on operational network security scanning by users?	No	_
SAHD-14	Can the device be hardened beyond the default provided state? Are instructions available from vendor for	No	_
SAHD-14.1	increased hardening? Can the system prevent access to BIOS or other	No	
SHAD-15	bootloaders during boot? Have additional hardening methods not included	Yes	
	in 2.3.19 been used to harden the device?	No	_

SECURITY GUIDANCE (SGUD)

	Availability of security guidance for operator and administrator of the device and manufacturer sales and service.		
	Does the device include security documentation		
SGUD-1	for the owner/operator?	No	
	Does the device have the capability, and provide instructions, for the permanent deletion of data		
	•		
SGUD-2	from the device or media?	Yes	
SGUD-3	Are all access accounts documented?	N/A	
	Can the owner/operator manage password		
SGUD-3.1	control for all accounts?	N/A	
	Does the product include documentation on		
	recommended compensating controls for the		
SGUD-4	device?	No	

No

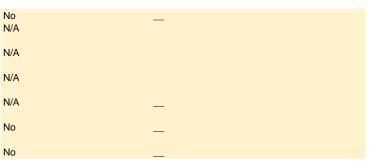

No

HEALTH DATA STORAGE CONFIDENTIALITY (STCF)

	The ability of the device to ensure unauthorized access does not compromise the integrity and confidentiality of personally identifiable information stored on the device or removable media.
STCF-1	Can the device encrypt data at rest?
STCF-1.1	Is all data encrypted or otherwise protected? Is the data encryption capability configured by
STCF-1.2	default?
	Are instructions available to the customer to
STCF-1.3	configure encryption?
	Can the encryption keys be changed or
STCF-2	configured?
	Is the data stored in a database located on the
STCF-3	device?
	Is the data stored in a database external to the
STCF-4	device?

TRANSMISSION CONFIDENTIALITY (TXCF) The ability of the device to ensure the

confidentiality of transmitted personally
identifiable information.
Can personally identifiable information be transmitted only via a point-to-point dedicated cable?
Is personally identifiable information encrypted prior to transmission via a network or removable media?

091-0288-00 Rev A

4-Aug-2022

TXCF-2.1	If data is not encrypted by default, can the customer configure encryption options?	N
	Is personally identifiable information transmission	
TXCF-3	restricted to a fixed list of network destinations? Are connections limited to authenticated	Y
TXCF-4	systems?	Y
	Are secure transmission methods supported/implemented (DICOM, HL7, IEEE	
TXCF-5	11073)?	Y

No	_
Yes	_
Yes	_
Yes	
165	

TRANSMISSION INTEGRITY (TXIG)

	The ability of the device to ensure the integrity of transmitted data.	
	Does the device support any mechanism (e.g.,	
	digital signatures) intended to ensure data is not	
TXIG-1	modified during transmission?	No
	Does the device include multiple sub-	
TXIG-2	components connected by external cables?	No

ata is not		
	No	
les?	No	
162:	NO	

	REMOTE SERVICE (RMOT)	
	Remote service refers to all kinds of device maintenance activities performed by a service person via network or other remote connection.	
RMOT-1	Does the device permit remote service connections for device analysis or repair?	No
RMOT-1.1	Does the device allow the owner/operator to initiative remote service sessions for device analysis or repair?	N/A
RMOT-1.2	Is there an indicator for an enabled and active remote session?	N/A
RMOT-1.3	Can patient data be accessed or viewed from the device during the remote session?	N/A
RMOT-2	Does the device permit or use remote service connections for predictive maintenance data?	No
	Does the device have any other remotely accessible functionality (e.g. software updates,	
RMOT-3	remote training)?	No

OTHER SECURITY CONSIDERATIONS (OTHR) NONE

Notes:

Note 1

Example note. Please keep individual notes to one cell. Please use separate notes for separate information
