Manufacturer Disclosure Statement for Medical Device Security -- MDS2

Question ID	Question		See note
DOC-1	Manufacturer Name	Spacelabs Healthcare	
DOC-2	Device Description	Sentinel Cardiology Information	_
		Management System. Version 11.5.5	
DOC-3	Device Model	98201	_
DOC-4	Document ID	091-0414-00 Rev A	_
DOC-5	Manufacturer Contact Information	Spacelabs Healtcare,	_
		35301 SE Center Street,	
		Snoqualmie, WA 98065	
DOC-6	Intended use of device in network-connected	The Sentinel is a software product. The	_
	environment:	application runs on client PCs in network	
		topologies. The intended use sentinel	
		stores the data from the spacelabs	
		diagnostic cardiology products such as	
		patient-worn Spacelabs ABP, ECG and	
		Holter monitors, Spacelabs analysis	
		softwares such as Pathfinder SL and	
		Lifescreen PRO.	
DOC-7	Document Release Date	Jul-22	_
DOC-8	Coordinated Vulnerability Disclosure: Does the	Yes	_
	manufacturer have a vulnerability disclosure		
	program for this device?		
DOC-9	ISAO: Is the manufacturer part of an Information	No	_
	Sharing and Analysis Organization?		
DOC-10	Diagram: Is a network or data flow diagram available	Yes	We have network diagrams of our DC suite with
	that indicates connections to other system		Sentinel as part of those models. This is not
	components or expected external resources?		published and can be made available on request.
DOC-11	SaMD: Is the device Software as a Medical Device	Yes	_
	(i.e. software-only, no hardware)?		
DOC-11.1	Does the SaMD contain an operating system?	No	

Spacelabs Healthcare 98201 091-0414-00 Rev A Jul-22

DOC-11.2	Does the SaMD rely on an owner/operator provided	Yes	Supported Operating Systems include Microsoft
	operating system?		Windows Server 2012 R2, Windows Server 2016,
			and Windows Server 2019
DOC-11.3	Is the SaMD hosted by the manufacturer?	No	_
DOC-11.4	Is the SaMD hosted by the customer?	Yes	

Yes, No, N/A, or See Note Note #

MANAGEMENT OF PERSONALLY IDENTIFIABLE INFORMATION

MPII-1	Can this device display, transmit, store, or modify	Yes	_
	personally identifiable information (e.g. electronic		
	Protected Health Information (ePHI))?		
MPII-2	Does the device maintain personally identifiable	Yes	_
	information?		
MPII-2.1	Does the device maintain personally identifiable	Yes	_
	information temporarily in volatile memory (i.e.,		
	until cleared by power-off or reset)?		
MPII-2.2	Does the device store personally identifiable	No	_
	information persistently on internal media?		
MPII-2.3	Is personally identifiable information preserved in	No	_
	the device's non-volatile memory until explicitly		
	erased?		
MPII-2.4	Does the device store personally identifiable	Yes	_
	information in a database?		
MPII-2.5	Does the device allow configuration to automatically	No	_
	delete local personally identifiable information after		
	it is stored to a long term solution?		
MPII-2.6	Does the device import/export personally identifiable	Yes	_
	information with other systems (e.g., a wearable		
	monitoring device might export personally		
	identifiable information to a server)?		

MPII-2.7	Does the device maintain personally identifiable	Yes	
	information when powered off, or during power		_
	service interruptions?		
MPII-2.8	Does the device allow the internal media to be	N/A	
	removed by a service technician (e.g., for separate		
	destruction or customer retention)?		
MPII-2.9	Does the device allow personally identifiable	Yes	
	information records be stored in a separate location		
	from the device's operating system (i.e. secondary		
	internal drive, alternate drive partition, or remote		
	storage location)?		
MPII-3	Does the device have mechanisms used for the	Yes	_
	transmitting, importing/exporting of personally		
	identifiable information?		
MPII-3.1	Does the device display personally identifiable	No	_
	information (e.g., video display, etc.)?		
MPII-3.2	Does the device generate hardcopy reports or images	Yes	_
	containing personally identifiable information?		
MPII-3.3	Does the device retrieve personally identifiable	Yes	Sentinel has ability to store files to file system
	information from or record personally identifiable		folders (potentially on removable media) is
	information to removable media (e.g., removable-		restricted by security role permissions.
	HDD, USB memory, DVD-R/RW,CD-R/RW, tape,		
	CF/SD card, memory stick, etc.)?		
MPII-3.4	Does the device transmit/receive or import/export	Yes	Sentinel can be configured to send PII to
	personally identifiable information via dedicated		Ambulatory ECG and ABP devices but it does not
	cable connection (e.g., RS-232, RS-423, USB,		need to and Spacelabs recommends that this not be
	FireWire, etc.)?		done.
MPII-3.5	Does the device transmit/receive personally	Yes	_
	identifiable information via a wired network		
	connection (e.g., RJ45, fiber optic, etc.)?		
MPII-3.6	Does the device transmit/receive personally	No	_
	identifiable information via a wireless network		
	connection (e.g., WiFi, Bluetooth, NFC, infrared,		
	cellular, etc.)?		

Spacelabs Healthcare 98201 091-0414-00 Rev A Jul-22

MPII-3.7	Does the device transmit/receive personally identifiable information over an external network (e.g., Internet)?	No	Sentinel does not require Intrnet to function. However, the customer has the option to implement Sentinel's Remote Data Transfer (RDT) feature where an internet connection may be required.
MPII-3.8	Does the device import personally identifiable information via scanning a document?	No	_
MPII-3.9	Does the device transmit/receive personally identifiable information via a proprietary protocol?	Yes	If the customer is using RDT that would receive PII in SNTL files transferred over HTTP/HTTPS. SNTL is a Spacelabs file format. SNTL files are encrypted.
MPII-3.10	Does the device use any other mechanism to transmit, import or export personally identifiable information?	No	_

Management of Private Data notes:

AUTOMATIC LOGOFF (ALOF)

The device's ability to prevent access and misuse by unauthorized users if device is left idle for a period of time.

ALOF-1	Can the device be configured to force reauthorization of logged-in user(s) after a predetermined length of inactivity (e.g., auto-logoff, session lock, password	Yes	
	protected screen saver)?		
ALOF-2	Is the length of inactivity time before autologoff/screen lock user or administrator	Yes	
	configurable?		

AUDIT CONTROLS (AUDT)

The ability to reliably audit activity on the device.

AUDT-1	Can the medical device create additional audit logs or	Yes	Sentinel generates audit records containing
	reports beyond standard operating system logs?		information which establishes what type of event
			occurred, when the event occurred, the identity of
			individuals or subjects associated with the event.
AUDT-1.1	Does the audit log record a USER ID?	Yes	_
AUDT-1.2	Does other personally identifiable information exist	Yes	The description field in the audit trail indicates the
	in the audit trail?		patient name.
AUDT-2	Are events recorded in an audit log? If yes, indicate	Yes	_
	which of the following events are recorded in the		
	audit log:		
AUDT-2.1	Successful login/logout attempts?	Yes	_
AUDT-2.2	Unsuccessful login/logout attempts?	Yes	_
AUDT-2.3	Modification of user privileges?	Yes	
AUDT-2.4	Creation/modification/deletion of users?	Yes	Any auditing of the staff records is audited.
AUDT-2.5	Presentation of clinical or PII data (e.g. display,	Yes	If a user reviews clinical data that's audited. If they
	print)?		begin editing records but do not complete the edit
			(and hence see the data e.g. patient data) that's
			audited. Print from the review web page is not
			audited because that is done via Adobe Acrobat not
			Sentinel.
AUDT-2.6	Creation/modification/deletion of data?	Yes	_
AUDT-2.7	Import/export of data from removable media (e.g.	Yes	_
	USB drive, external hard drive, DVD)?		
AUDT-2.8	Receipt/transmission of data or commands over a	Yes	_
	network or point-to-point connection?		
AUDT-2.8.1	Remote or on-site support?	No	_
AUDT-2.8.2	Application Programming Interface (API) and similar	No	_
	activity?		
AUDT-2.9	Emergency access?	No	_
AUDT-2.10	Other events (e.g., software updates)?	N/A	_
AUDT-2.11	Is the audit capability documented in more detail?	N/A	Sentinel generates audit records containing
			information which establishes what type of event
			occurred, when the event occurred, the identity of
			individuals or subjects associated with the event.
AUDT-3	Can the owner/operator define or select which	Yes	_
	events are recorded in the audit log?		

Spacelabs Healthcare 98201 091-0414-00 Rev A Jul-22

AUDT-4	Is a list of data attributes that are contured in the	Yes	
AUD1-4	Is a list of data attributes that are captured in the	res	_
	audit log for an event available?		
AUDT-4.1	Does the audit log record date/time?	Yes	
AUDT-4.1.1	Can date and time be synchronized by Network Time	Yes	
	Protocol (NTP) or equivalent time source?		
AUDT-5	Can audit log content be exported?	No	_
AUDT-5.1	Via physical media?	No	
AUDT-5.2	Via IHE Audit Trail and Node Authentication (ATNA)	No	_
	profile to SIEM?		
AUDT-5.3	Via Other communications (e.g., external service	No	_
	device, mobile applications)?		
AUDT-5.4	Are audit logs encrypted in transit or on storage	No	_
	media?		
AUDT-6	Can audit logs be monitored/reviewed by	Yes	Administrators can view the audit trail in the
	owner/operator?		Sentinel user interface.
AUDT-7	Are audit logs protected from modification?	Yes	System administrators can delete the whole audit
			trail but no user can modify any audit entries.
AUDT-7.1	Are audit logs protected from access?	Yes	Stored in the database with all protection at rest
			and in transit that implies.
AUDT-8	Can audit logs be analyzed by the device?	No	

AUTHORIZATION (AUTH)

The ability of the device to determine the authorization of users.

	dutification of users.		
AUTH-1	Does the device prevent access to unauthorized users	Yes	_
	through user login requirements or other		
	mechanism?		
AUTH-1.1	Can the device be configured to use federated	Yes	_
	credentials management of users for authorization		
	(e.g., LDAP, OAuth)?		
AUTH-1.2	Can the customer push group policies to the device	Yes	_
	(e.g., Active Directory)?		
AUTH-1.3	Are any special groups, organizational units, or group	Yes	_
	policies required?		

091-0414-00 Rev A

Spacelabs Healthcare 98201 091-0414-00 Rev A Jul-22

AUTH-2	Can users be assigned different privilege levels based	Yes	Sentinel has security roles which can be defined by
	on 'role' (e.g., user, administrator, and/or service,		the customer to indicate which kinds of users have
	etc.)?		permission to perform which Sentinel functions. It
			also have mandatory filters in these roles which
			define which records these kinds of users are
			permitted to access (e.g. only patients in the ward
			where the user works).
AUTH-3	Can the device owner/operator grant themselves	Yes	_
	unrestricted administrative privileges (e.g., access		
	operating system or application via local root or		
	administrator account)?		
AUTH-4	Does the device authorize or control all API access	No	HL7 and DICOM does not support authentication.
	requests?		
AUTH-5	Does the device run in a restricted access mode, or	N/A	_
	'kiosk mode', by default?		

CYBER SECURITY PRODUCT UPGRADES (CSUP)

The ability of on-site service staff, remote service staff, or authorized customer staff to install/upgrade device's security patches.

	device 3 security pateries.		
CSUP-1	Does the device contain any software or firmware	Yes	_
	which may require security updates during its		
	operational life, either from the device manufacturer		
	or from a third-party manufacturer of the		
	software/firmware? If no, answer "N/A" to		
	questions in this section.		
CSUP-2	Does the device contain an Operating System? If yes,	No	Sentinel is a software product. It is the customers
	complete 2.1-2.4.		responsibility to provide the physical PC on which it
			runs.
CSUP-2.1	Does the device documentation provide instructions	Yes	
	for owner/operator installation of patches or		
	software updates?		

CSUP-2.2	Does the device require vendor or vendor-authorized	Yes	
	service to install patches or software updates?		
CSUP-2.3	Does the device have the capability to receive	No	_
	remote installation of patches or software updates?		
CCLID 2.4	Booth and to be to fort and to the con-	N	
CSUP-2.4	Does the medical device manufacturer allow security updates from any third-party manufacturers (e.g.,	INO	_
	Microsoft) to be installed without approval from the		
	manufacturer?		
CSUP-3	Does the device contain Drivers and Firmware? If yes,	No	
	complete 3.1-3.4.		_
CSUP-3.1	Does the device documentation provide instructions	No	_
	for owner/operator installation of patches or		
	software updates?		
CSUP-3.2	Does the device require vendor or vendor-authorized	No	_
	service to install patches or software updates?		
CSUP-3.3	Does the device have the capability to receive	No	
C30P-3.3	remote installation of patches or software updates?		_
	remote instantation of patenes of software apautes:		
CSUP-3.4	Does the medical device manufacturer allow security	No	_
	updates from any third-party manufacturers (e.g.,		
	Microsoft) to be installed without approval from the		
	manufacturer?		
CSUP-4		No	_
	yes, complete 4.1-4.4.		
CSUP-4.1	Does the device documentation provide instructions	No	_
	for owner/operator installation of patches or		
CCLID 4.2	software updates?	Nie	
CSUP-4.2	Does the device require vendor or vendor-authorized service to install patches or software updates?	INO	_
	Service to instail patches of software updates!		
CSUP-4.3	Does the device have the capability to receive	No	
	remote installation of patches or software updates?		
-	·		

CCLID 4 4	Donatha madical davies assessfuntamentalles and a	Ne	
CSUP-4.4	Does the medical device manufacturer allow security	INO	_
	updates from any third-party manufacturers (e.g.,		
	Microsoft) to be installed without approval from the		
	manufacturer?		
CSUP-5	Does the device contain Non-Operating System	Yes	_
	commercial off-the-shelf components? If yes,		
	complete 5.1-5.4.		
CSUP-5.1	Does the device documentation provide instructions	Yes	_
	for owner/operator installation of patches or		
	software updates?		
CSUP-5.2	Does the device require vendor or vendor-authorized	Yes	_
	service to install patches or software updates?		
CSUP-5.3	Does the device have the capability to receive	No	_
	remote installation of patches or software updates?		
CSUP-5.4	Does the medical device manufacturer allow security	N/A	
	updates from any third-party manufacturers (e.g.,		
	Microsoft) to be installed without approval from the		
	manufacturer?		
CSUP-6	Does the device contain other software components	Yes	Sentinel does manage the software licences for
	(e.g., asset management software, license		Sentinel, Pathfinder SL and Lifescreen PRO.
	management)? If yes, please provide details or		
	refernce in notes and complete 6.1-6.4.		
CSUP-6.1	Does the device documentation provide instructions	Yes	
	for owner/operator installation of patches or		
	software updates?		
CSUP-6.2	Does the device require vendor or vendor-authorized	Yes	
	service to install patches or software updates?		
	' '		
CSUP-6.3	Does the device have the capability to receive	No	
	remote installation of patches or software updates?		
CSUP-6.4	Does the medical device manufacturer allow security	Yes	
	updates from any third-party manufacturers (e.g.,		
	Microsoft) to be installed without approval from the		
	manufacturer?		
	manaracturer:		

Spacelabs Healthcare 98201 091-0414-00 Rev A Jul-22

CSUP-7	Does the manufacturer notify the customer when updates are approved for installation?	Yes	_
CSUP-8	Does the device perform automatic installation of software updates?	No	_
CSUP-9	Does the manufacturer have an approved list of third- party software that can be installed on the device?	No	_
CSUP-10	Can the owner/operator install manufacturer- approved third-party software on the device themselves?	No	Sentinel is a software product installed in a customer's PC/VM and It is the customer's responsibility to install or not third-party software in PC/VM.
CSUP-10.1	Does the system have mechanism in place to prevent installation of unapproved software?	No	Sentinel is a software product installed in a customer's PC/VM and It is the customer's responsibility to install or not third-party software in PC/VM.
CSUP-11	Does the manufacturer have a process in place to assess device vulnerabilities and updates?	Yes	_
CSUP-11.1	Does the manufacturer provide customers with review and approval status of updates?	No	_
CSUP-11.2	Is there an update review cycle for the device?	No	

HEALTH DATA DE-IDENTIFICATION (DIDT)

The ability of the device to directly remove information that allows identification of a person.

	Does the device provide an integral capability to deidentify personally identifiable information?		The customer has the ability to edit patient and staff records and remove PII
DIDT-1.1	Does the device support de-identification profiles	No	_
	that comply with the DICOM standard for de- identification?		

DATA BACKUP AND DISASTER RECOVERY (DTBK)

Spacelabs Healthcare	98201	091-0414-00 Rev A	Jul-22
	The ability to recover after damage or destruction of device data, hardware, software, or site configuration information.		
DTBK-1	Does the device maintain long term primary storage of personally identifiable information / patient information (e.g. PACS)?	Yes	_
DTBK-2	Does the device have a "factory reset" function to restore the original device settings as provided by the manufacturer?	No	_
DTBK-3	Does the device have an integral data backup capability to removable media?	Yes	_
DTBK-4	Does the device have an integral data backup capability to remote storage?	No	_
DTBK-5	Does the device have a backup capability for system configuration information, patch restoration, and software restoration?	Yes	_
DTBK-6	Does the device provide the capability to check the integrity and authenticity of a backup?	No	_

EMERGENCY ACCESS (EMRG)

The ability of the device user to access personally identifiable information in case of a medical emergency situation that requires immediate access to stored personally identifiable information.

EMRG-1	Does the device incorporate an emergency access	No	_
	(i.e. "break-glass") feature?		

HEALTH DATA INTEGRITY AND AUTHENTICITY (IGAU)

How the device ensures that the stored data on the device has not been altered or destroyed in a non-authorized manner and is from the originator.

Spacelabs Healthcare	98201	091-0414-00 Rev A	Jul-22
----------------------	-------	-------------------	--------

IGAU-1	Does the device provide data integrity checking	No	
	mechanisms of stored health data (e.g., hash or		
	digital signature)?		
IGAU-2	Does the device provide error/failure protection and	Yes	The customer could set up RAID disks if they wish.
	recovery mechanisms for stored health data (e.g.,		That would be transparent to the Sentinel software.
	RAID-5)?		

MALWARE DETECTION/PROTECTION (MLDP)

The ability of the device to effectively prevent, detect and remove malicious software (malware).

MLDP-1	Is the device capable of hosting executable software?	No	
MLDP-2	Does the device support the use of anti-malware software (or other anti-malware mechanism)? Provide details or reference in notes.	Yes	Please refer exclusions from real time antivirus scanning document :077-0255-00 Rev G
MLDP-2.1	Does the device include anti-malware software by default?	No	_
MLDP-2.2	Does the device have anti-malware software available as an option?	No	_
MLDP-2.3	Does the device documentation allow the owner/operator to install or update anti-malware software?	Yes	_
MLDP-2.4	Can the device owner/operator independently (re-)configure anti-malware settings?	Yes	_
MLDP-2.5	Does notification of malware detection occur in the device user interface?	N/A	_
MLDP-2.6	Can only manufacturer-authorized persons repair systems when malware has been detected?	N/A	_
MLDP-2.7	Are malware notifications written to a log?	N/A	_
MLDP-2.8	Are there any restrictions on anti-malware (e.g., purchase, installation, configuration, scheduling)?	N/A	_
MLDP-3	If the answer to MLDP-2 is NO, and anti-malware cannot be installed on the device, are other compensating controls in place or available?	N/A	

Spacelabs Healthcare	98201	091-0414-00 Rev A	Jul-22
----------------------	-------	-------------------	--------

MLDP-4	Does the device employ application whitelisting that	N/A	_
	restricts the software and services that are permitted		
	to be run on the device?		
MLDP-5	Does the device employ a host-based intrusion	N/A	_
	detection/prevention system?		
MLDP-5.1	Can the host-based intrusion detection/prevention	N/A	_
	system be configured by the customer?		
MLDP-5.2	Can a host-based intrusion detection/prevention	N/A	
	system be installed by the customer?		

NODE AUTHENTICATION (NAUT)

The ability of the device to authenticate communication partners/nodes.

	communication partners, nodes.		
NAUT-1	Does the device provide/support any means of node	No	
	authentication that assures both the sender and the		
	recipient of data are known to each other and are		
	authorized to receive transferred information (e.g.		
	Web APIs, SMTP, SNMP)?		
NAUT-2	Are network access control mechanisms supported	No	Sentinel is just software that resides in the
	(E.g., does the device have an internal firewall, or use		customer's network. It doesn't provide whitelisting
	a network connection white list)?		etc of itself. The operating system, IIS, and the
			customer network do that.
NAUT-2.1	Is the firewall ruleset documented and available for	No	
	review?		
NAUT-3	Does the device use certificate-based network	Yes	Sentinel supports HTTPS
	connection authentication?		

CONNECTIVITY CAPABILITIES (CONN)

All network and removable media connections must be considered in determining appropriate security controls. This section lists connectivity capabilities that may be present on the device.

CONN-1	Does the device have hardware connectivity	Yes	Sentinel have capabilites of connecting with
	capabilities?		hardware device like Eclispe pro, Eclipse mini,
			Ontrak and more.

CONN-1.1	Does the device support wireless connections?	Yes	While Sentinel does not explicitly have wireless capabilities. Customers can use it in a wireless network . Sentinel sits in the customer's network.
CONN-1.1.1	Does the device support Wi-Fi?	Yes	While Sentinel does not explicitly have wireless capabilities. Customers can use it in a wireless network. Sentinel sits in the customer's network.
CONN-1.1.2	Does the device support Bluetooth?	N/A	
CONN-1.1.3	Does the device support other wireless network connectivity (e.g. LTE, Zigbee, proprietary)?	No	_
CONN-1.1.4	Does the device support other wireless connections (e.g., custom RF controls, wireless detectors)?	No	
CONN-1.2	Does the device support physical connections?	N/A	
CONN-1.2.1	Does the device have available RJ45 Ethernet ports?	N/A	_
CONN-1.2.2	Does the device have available USB ports?	Yes	Depends if the PC on which Sentinel is installed has USB ports.
CONN-1.2.3	Does the device require, use, or support removable memory devices?	No	_
CONN-1.2.4	Does the device support other physical connectivity?	Yes	_
CONN-2	Does the manufacturer provide a list of network ports and protocols that are used or may be used on the device?	N/A	Sentinel is a software product that will be hosted on customer hardware. Spacelabs can provide the necessary ports and protocols for customers to configure.
CONN-3	Can the device communicate with other systems within the customer environment?	Yes	EMRs through HL7, PACS though DICOM, other systems through file drops and HTTP/HTTPS
CONN-4	Can the device communicate with other systems external to the customer environment (e.g., a service host)?	No	_
CONN-5	Does the device make or receive API calls?	N/A	_
CONN-6	Does the device require an internet connection for its intended use?	No	
CONN-7	Does the device support Transport Layer Security (TLS)?	Yes	

091-0414-00 Rev A

Spacelabs Healthcare 98201

091-0414-00 Rev A

Jul-22

CONN-7.1	Is TLS configurable?		This is a software application. TLS configurations are applied at the OS layer.
CONN-8	Does the device provide operator control	No	
	functionality from a separate device (e.g.,		
	telemedicine)?		

PERSON AUTHENTICATION (PAUT)

The ability to configure the device to authenticate users.

Does the device support and enforce unique IDs and	Yes	_
passwords for all users and roles (including service		
accounts)?		
Does the device enforce authentication of unique IDs	Yes	_
and passwords for all users and roles (including		
service accounts)?		
Is the device configurable to authenticate users	Yes	_
through an external authentication service (e.g., MS		
Active Directory, NDS, LDAP, OAuth, etc.)?		
Is the device configurable to lock out a user after a	Yes	_
certain number of unsuccessful logon attempts?		
Are all default accounts (e.g., technician service	Yes	_
accounts, administrator accounts) listed in the		
documentation?		
Can all passwords be changed?	Yes	_
Is the device configurable to enforce creation of user	Yes	_
account passwords that meet established		
(organization specific) complexity rules?		
Does the device support account passwords that	Yes	_
expire periodically?		
Does the device support multi-factor authentication?	Yes	Multifactor authentication can configurable through
		active directory.
Does the device support single sign-on (SSO)?	Yes	_
Can user accounts be disabled/locked on the device?	Yes	_
	passwords for all users and roles (including service accounts)? Does the device enforce authentication of unique IDs and passwords for all users and roles (including service accounts)? Is the device configurable to authenticate users through an external authentication service (e.g., MS Active Directory, NDS, LDAP, OAuth, etc.)? Is the device configurable to lock out a user after a certain number of unsuccessful logon attempts? Are all default accounts (e.g., technician service accounts, administrator accounts) listed in the documentation? Can all passwords be changed? Is the device configurable to enforce creation of user account passwords that meet established (organization specific) complexity rules? Does the device support account passwords that expire periodically? Does the device support multi-factor authentication?	passwords for all users and roles (including service accounts)? Does the device enforce authentication of unique IDs and passwords for all users and roles (including service accounts)? Is the device configurable to authenticate users through an external authentication service (e.g., MS Active Directory, NDS, LDAP, OAuth, etc.)? Is the device configurable to lock out a user after a certain number of unsuccessful logon attempts? Are all default accounts (e.g., technician service accounts, administrator accounts) listed in the documentation? Can all passwords be changed? Is the device configurable to enforce creation of user account passwords that meet established (organization specific) complexity rules? Does the device support account passwords that expire periodically? Does the device support multi-factor authentication? Yes Does the device support single sign-on (SSO)?

Spacelabs Healthcare 98201 091-0414-00 Rev A Jul-22

PAUT-11	Does the device support biometric controls?	Yes	Using Active Directory and single sign on customers can use all biometric and other controls supported by Active Directory.
PAUT-12	Does the device support physical tokens (e.g. badge access)?	N/A	
PAUT-13	Does the device support group authentication (e.g. hospital teams)?	Yes	_
PAUT-14	Does the application or device store or manage authentication credentials?	Yes	Only for non-Active Directory users. For Active Directory the authentication credentials are stored in Active Directory.
PAUT-14.1	Are credentials stored using a secure method?	Yes	Non-Active Directory users credentials are stored in the database and even then are further encrypted.

PHYSICAL LOCKS (PLOK)

Physical locks can prevent unauthorized users with physical access to the device from compromising the integrity and confidentiality of personally identifiable information stored on the device or on removable media

PLOK-1	Is the device software only? If yes, answer "N/A" to	Yes	_
	remaining questions in this section.		
PLOK-2	Are all device components maintaining personally	N/A	_
	identifiable information (other than removable		
	media) physically secure (i.e., cannot remove without		
	tools)?		
PLOK-3	Are all device components maintaining personally	N/A	_
	identifiable information (other than removable		
	media) physically secured behind an individually		
	keyed locking device?		
PLOK-4	Does the device have an option for the customer to	N/A	_
	attach a physical lock to restrict access to removable		
	media?		

Spacelabs Healthcare 98201 091-0414-00 Rev A Jul-22

ROADMAP FOR THIRD PARTY COMPONENTS IN DEVICE LIFE CYCLE (RDMP)

Manufacturer's plans for security support of thirdparty components within the device's life cycle.

RDMP-1	Was a secure software development process, such as	Yes	_
	ISO/IEC 27034 or IEC 62304, followed during product		
	development?		
RDMP-2	Does the manufacturer evaluate third-party	Yes	_
	applications and software components included in		
	the device for secure development practices?		
RDMP-3	Does the manufacturer maintain a web page or other	Yes	
	source of information on software support dates and		
	updates?		
RDMP-4	Does the manufacturer have a plan for managing	Yes	The list of third-party software is defined in the
	third-party component end-of-life?		products' software development plan.

SOFTWARE BILL OF MATERIALS (SBoM)

A Software Bill of Material (SBoM) lists all the software components that are incorporated into the device being described for the purpose of operational security planning by the healthcare delivery organization. This section supports controls in the RDMP section.

SBOM-1	Is the SBoM for this product available?	Yes	_
SBOM-2	Does the SBoM follow a standard or common	Yes	
	method in describing software components?		
SBOM-2.1	Are the software components identified?	Yes	_
SBOM-2.2	Are the developers/manufacturers of the software	Yes	_
	components identified?		
SBOM-2.3	Are the major version numbers of the software	Yes	_
	components identified?		
SBOM-2.4	Are any additional descriptive elements identified?	N/A	
SBOM-3	Does the device include a command or process	Yes	
	method available to generate a list of software		
	components installed on the device?		
SBOM-4	Is there an update process for the SBoM?	Yes	

Spacelabs Healthcare 98201 091-0414-00 Rev A Jul-22

SYSTEM AND APPLICATION HARDENING (SAHD)

The device's inherent resistance to cyber attacks and malware.

SAHD-1	Is the device hardened in accordance with any industry standards?	N/A	Sentinel is dependent on the controls and system hardening of the underlying Windows operating system.
SAHD-2	Has the device received any cybersecurity certifications?	No	_
SAHD-3	Does the device employ any mechanisms for software integrity checking	Yes	_
SAHD-3.1	Does the device employ any mechanism (e.g., release specific hash key, checksums, digital signature, etc.) to ensure the installed software is manufacturerauthorized?	Yes	
SAHD-3.2	Does the device employ any mechanism (e.g., release specific hash key, checksums, digital signature, etc.) to ensure the software updates are the manufacturer authorized updates?		_
SAHD-4	Can the owner/operator perform software integrity checks (i.e., verify that the system has not been modified or tampered with)?	No	_
SAHD-5	Is the system configurable to allow the implementation of file-level, patient level, or other types of access controls?	Yes	Mandatory filters ensure that users only see the patient and test records they are authorized to see (e.g. only the patients in the ward where a nurse works). These controls are customer administrator configurable.
SAHD-5.1	Does the device provide role-based access controls?	Yes	Sentinel has security roles. All users must belong to one or more of these roles. They restrict what product functions a user can perform and what records a user can access.
SAHD-6	Are any system or user accounts restricted or disabled by the manufacturer at system delivery?	N/A	_

091-0414-00 Rev A

Spacelabs Healthcare 98201 091-0414-00 Rev A Jul-22

Spacelabs Healthcare

SAHD-6.1	Are any system or user accounts configurable by the	Yes	The system administrator account (username:
	end user after initial configuration?		admin) is the only account shipped at system
			delivery. All other user accounts are configured by
			the customer thereafter (or automatically
			configured by Active Directory)
SAHD-6.2	Does this include restricting certain system or user	Yes	There are no service technician accounts. Only the
	accounts, such as service technicians, to least		system admin account is delivered.
	privileged access?		ľ
SAHD-7	Are all shared resources (e.g., file shares) which are	No	Customer can disable these shared resources on the
	not required for the intended use of the device		host.
	disabled?		
SAHD-8	Are all communication ports and protocols that are	Yes	Sentinel is a software product. Spacelabs can
	not required for the intended use of the device		provide the necessary ports and protocols for
	disabled?		customers to configure.
SAHD-9	Are all services (e.g., telnet, file transfer protocol	No	The installer does not disable or delete services or
	[FTP], internet information server [IIS], etc.), which		ports on the PC/VM on which it is installed.
	are not required for the intended use of the device		
	deleted/disabled?		
SAHD-10	Are all applications (COTS applications as well as OS-	No	The installer does not delete any applications from
	included applications, e.g., MS Internet Explorer, etc.)		the PC/VM on which it is installed.
	which are not required for the intended use of the		
	device deleted/disabled?		
SAHD-11	Can the device prohibit boot from uncontrolled or	No	_
	removable media (i.e., a source other than an		
	internal drive or memory component)?		
SAHD-12	Can unauthorized software or hardware be installed	N/A	_
	on the device without the use of physical tools?		
SAHD-13	Does the product documentation include information	N/A	_
	on operational network security scanning by users?		
SAHD-14	Can the device be hardened beyond the default	N/A	_
	provided state?		
SAHD-14.1		N/A	_
	hardening?		
SHAD-15	Can the system prevent access to BIOS or other	N/A	_
	bootloaders during boot?		

Spacelabs Healthcare	98201	091-0414-00 Rev A	Jul-22
----------------------	-------	-------------------	--------

SAHD-16	Have additional hardening methods not included in	N/A	_
	2.3.19 been used to harden the device?		

SECURITY GUIDANCE (SGUD)

Availability of security guidance for operator and administrator of the device and manufacturer sales and service.

SGUD-1	Does the device include security documentation for	No	_
	the owner/operator?		
SGUD-2	Does the device have the capability, and provide	Yes	The operator manual provides the user how to
	instructions, for the permanent deletion of data from		delete patient, test and case records. The admin
	the device or media?		manual provides the administrator how to delete
			other records.
SGUD-3	Are all access accounts documented?	No	_
SGUD-3.1	Can the owner/operator manage password control	Yes	_
	for all accounts?		
SGUD-4	Does the product include documentation on	No	
	recommended compensating controls for the device?		

HEALTH DATA STORAGE CONFIDENTIALITY (STCF)

The ability of the device to ensure unauthorized access does not compromise the integrity and confidentiality of personally identifiable information stored on the device or removable media.

STCF-1	Can the device encrypt data at rest?	Yes	Sentinel uses Microsoft Transparent Data
			Encryption to protect database data at rest
STCF-1.1	Is all data encrypted or otherwise protected?	Yes	_
STCF-1.2	Is the data encryption capability configured by default?	Yes	

Spacelabs Healthcare 98201 091-0414-00 Rev A Jul-22

STCF-1.3	Are instructions available to the customer to configure encryption?	No	_
STCF-2	Can the encryption keys be changed or configured?	Yes	
STCF-3	Is the data stored in a database located on the	Yes	_
	device?		
STCF-4	Is the data stored in a database external to the	Yes	
	device?		

TRANSMISSION CONFIDENTIALITY (TXCF)

The ability of the device to ensure the confidentiality of transmitted personally identifiable information.

TXCF-1	Can personally identifiable information be	Yes	_
	transmitted only via a point-to-point dedicated		
	cable?		
TXCF-2	Is personally identifiable information encrypted prior	Yes	_
	to transmission via a network or removable media?		
TXCF-2.1	If data is not encrypted by default, can the customer	Yes	In v11.5.5 only HTTPS if HTTPS option ticked in the
	configure encryption options?		installer.
TXCF-3	Is personally identifiable information transmission	See Notes	Sentinel is a software product. It is recommended
	restricted to a fixed list of network destinations?		that customers follow the Spacelabs networking
			deployment guide.
TXCF-4	Are connections limited to authenticated systems?	See Notes	Sentinel is a software product. It is recommended
			that customers follow the Spacelabs networking
			deployment guide.
TXCF-5	Are secure transmission methods	No	_
	supported/implemented (DICOM, HL7, IEEE 11073)?		

TRANSMISSION INTEGRITY (TXIG)

The ability of the device to ensure the integrity of transmitted data.

Spacelabs Healthcare	98201	091-0414-00 Rev A	Jul-22
----------------------	-------	-------------------	--------

Does the device support any mechanism (e.g., digital signatures) intended to ensure data is not modified during transmission?	No	
Does the device include multiple sub-components connected by external cables?	N/A	_

	REMOTE SERVICE (RMOT)		
	Remote service refers to all kinds of device maintenance activities performed by a service person via network or other remote connection.		
RMOT-1	Does the device permit remote service connections for device analysis or repair?	No	Host server and customer controls can facilitate remote access.
RMOT-1.1	Does the device allow the owner/operator to initiative remote service sessions for device analysis or repair?	N/A	_
RMOT-1.2	Is there an indicator for an enabled and active remote session?	No	_
RMOT-1.3	Can patient data be accessed or viewed from the device during the remote session?	Yes	If the customer were to allow remote control of the PC and it were logged into Sentinel.
RMOT-2	Does the device permit or use remote service connections for predictive maintenance data?	No	_
RMOT-3	Does the device have any other remotely accessible functionality (e.g. software updates, remote training)?	N/A
