Manufacturer Disclosure Statement for Medical Device Security -- MDS2

Spacelabs Healthcare 92518

091-0233-01_Rev_A

25-Oct-2023

Question ID	Question		See note
DOC-1 DOC-2	Manufacturer Name Device Description	Spacelabs Healthcare The 92518 Multigas Module monitors gas concentrations and alerts clinical personnel when the concentration of anesthetic agents, oxygen, carbon dioxide, or nitrous oxide falls outside of defined limits.	_
		The anesthetic agent being administered is automatically identified.	
DOC-3 DOC-4	Device Model Document ID	92518 091-0233-01_Rev_A	—
DOC-5	Manufacturer Contact Information	Spacelabs Healtcare, 35301 SE Center Street, Snoqualmie, WA 98065	_
DOC-6	Intended use of device in network-connected environment:	The 92518 Multigas Module monitors gas concentrations and alerts clinical personnel when the concentration of anesthetic agents, oxygen, carbon dioxide, or nitrous oxide falls outside of defined limits. The anesthetic agent being administered is automatically identified. The 92518 module is intended for use with Spacelabs Healthcare monitoring system.	
DOC-7 DOC-8	Document Release Date Coordinated Vulnerability Disclosure: Does the manufacturer have a vulnerability disclosure program for this device?	25-10-2023	We publish bulletins for major vulnerabilities and threats as they emerge and we assess them. They are found on our website bttps://www.casedabchoaltbcare.com/products/co
DOC-9	ISAO: Is the manufacturer part of an Information	Yes No	https://www.spacelabshealthcare.com/products/se curity/security-advisories-and-archives/
DOC-10	Sharing and Analysis Organization? Diagram: Is a network or data flow diagram available that indicates connections to other system components or expected external resources?	No	Multigas Module 92518 is a product that interfaces directly with Spacelabs monitors Qube, Qube Mini and Xprezzon
DOC-11	SaMD: Is the device Software as a Medical Device (i.e. software-only, no hardware)?	No	_
DOC-11.1 DOC-11.2	Does the SaMD contain an operating system? Does the SaMD rely on an owner/operator provided operating system?	N/A N/A	_ _
DOC-11.3	Is the SaMD hosted by the manufacturer?	N/A	
DOC-11.4	Is the SaMD hosted by the customer?	N/A	
		Yes, No, N/A, or See Note	Note #
MPII-1	MANAGEMENT OF PERSONALLY IDENTIFIABLE INFORMATION Can this device display, transmit, store, or modify personally identifiable information (e.g. electronic	No	-
MPII-2	Protected Health Information (ePHI))? Does the device maintain personally identifiable	No	
MPII-2.1	information? Does the device maintain personally identifiable information temporarily in volatile memory (i.e.,	N/A	_
MPII-2.2	until cleared by power-off or reset)? Does the device store personally identifiable information persistently on internal media?	N/A	-
MPII-2.3	Is personally identifiable information preserved in the device's non-volatile memory until explicitly erased?	N/A	-
MPII-2.4	Does the device store personally identifiable information in a database?	N/A	_

•	e generate hardcopy reports or	No	As a standalone product, the Specialty Module
information?	ing personally identifiable		cannot maintain or transmit ePHI. The Specialty
			Module works only when integrated with Spacelabs
			monitoring products, which can maintain or
			transmit ePHI. The Specialty Module collects
			physiological data from devices connected to the
			patient and sends that data to Spacelabs monitors.
			Spacelabs Monitors in turn combine that
			physiological data with patient demographic data, which is either displayed on the monitor, printed by
			the monitor, or sent to other Spacelabs devices on
			the hospital network. Please refer to the MDS2
			form for the monitors for specific information
			regarding the monitors.
MPII-3.3 Does the device	e retrieve personally identifiable	N/A	
information from	m or record personally identifiable		
	removable media (e.g., removable-		
	ory, DVD-R/RW,CD-R/RW, tape,		
	mory stick, etc.)?	N	
	e transmit/receive or import/export tifiable information via dedicated	No	—
	on (e.g., RS-232, RS-423, USB,		
FireWire, etc.)?			
	e transmit/receive personally	N/A	
	ormation via a wired network	.,	_
	., RJ45, fiber optic, etc.)?		
MPII-3.6 Does the device	e transmit/receive personally	N/A	_

AUTOMATIC LOGOFF (ALOF)

Spacelabs Healthcare 92518

The device's ability to prevent access and misuse by unauthorized users if device is left idle for a period of time.

41.05.1	Can the device he configured to form	N1/A	
ALOF-1	Can the device be configured to force	N/A	
	reauthorization of logged-in user(s) after a		
	predetermined length of inactivity (e.g., auto-logoff,		
	session lock, password protected screen saver)?		
ALOF-2	Is the length of inactivity time before auto-	N/A	
	logoff/screen lock user or administrator		
	configurable?		
	AUDIT CONTROLS (AUDT)		
	The ability to reliably audit activity on the device.		
AUDT-1	Can the medical device create additional audit logs	N/A	
	or reports beyond standard operating system logs?		
AUDT-1.1	Does the audit log record a USER ID?	N/A	
AUDT-1.2	Does other personally identifiable information exist	N/A	
	in the audit trail?		
AUDT-2	Are events recorded in an audit log? If yes, indicate	N/A	
	which of the following events are recorded in the	.,,	
	audit log:		
AUDT-2.1	Successful login/logout attempts?	N/A	
AUDT-2.2	Unsuccessful login/logout attempts?	N/A	_
AUDT-2.3	Modification of user privileges?	N/A	-
AUDT-2.4	Creation/modification/deletion of users?	N/A	—
AUDT-2.5	Presentation of clinical or PII data (e.g. display,	N/A	—
AUDT-2.5	print)?	N/A	—
AUDT-2.6	Creation/modification/deletion of data?	N/A	
AUDT-2.7			—
AUDI-2.7	Import/export of data from removable media (e.g.	N/A	
	USB drive, external hard drive, DVD)?	N/A	
AUDT-2.8	Receipt/transmission of data or commands over a	N/A	
	network or point-to-point connection?	N/A	
AUDT-2.8.1	Remote or on-site support?	N/A	
AUDT-2.8.2	Application Programming Interface (API) and similar	N/A	-
	activity?		
AUDT-2.9	Emergency access?	N/A	_
AUDT-2.10	Other events (e.g., software updates)?	N/A	_
AUDT-2.11	Is the audit capability documented in more detail?	N/A	-
AUDT-3	Can the owner/operator define or select which	N/A	
	events are recorded in the audit log?		
AUDT-4	Is a list of data attributes that are captured in the	N/A	—
	audit log for an event available?		
AUDT-4.1	Does the audit log record date/time?	N/A	-
AUDT-4.1.1	Can date and time be synchronized by Network Time	N/A	-
	Protocol (NTP) or equivalent time source?		
AUDT-5	Can audit log content be exported?	N/A	—
AUDT-5.1	Via physical media?	N/A	-
AUDT-5.2	Via IHE Audit Trail and Node Authentication (ATNA)	N/A	-
	profile to SIEM?	N1/A	
AUDT-5.3	Via Other communications (e.g., external service	N/A	<u> </u>
	device, mobile applications)?		
AUDT-5.4	Are audit logs encrypted in transit or on storage	N/A	-
	media?		
AUDT-6	Can audit logs be monitored/reviewed by	N/A	-
	owner/operator?		
AUDT-7	Are audit logs protected from modification?	N/A	
AUDT-7.1	Are audit logs protected from access?	N/A	
AUDT-8	Can audit logs be analyzed by the device?	N/A	
	AUTHORIZATION (AUTH)		
	The ability of the device to determine the		
	authorization of users.		
AUTH-1	Does the device prevent access to unauthorized	N/A	
	users through user login requirements or other		
	mechanism?		
AUTH-1.1	Can the device be configured to use federated	N/A	
	credentials management of users for authorization		
	(e.g., LDAP, OAuth)?		
AUTH-1.2	Can the customer push group policies to the device	N/A	
	(e.g., Active Directory)?		

25-Oct-2023

AUTH-1.2 Call the customer pash group policies to the device IV/A (e.g., Active Directory)? AUTH-1.3 Are any special groups, organizational units, or group N/A policies required?

Spacelabs Healthcare 92518

Spacelabs Healthcare	92518	091-0233-01_Rev_A	25-Oct-2023
AUTH-2	Can users be assigned different privilege levels based on 'role' (e.g., user, administrator, and/or service, etc.)?	N/A	-
AUTH-3	Can the device owner/operator grant themselves unrestricted administrative privileges (e.g., access operating system or application via local root or administrator account)?	N/A	-
AUTH-4	Does the device authorize or control all API access requests?	N/A	-
AUTH-5	Does the device run in a restricted access mode, or 'kiosk mode', by default?	N/A	-
	CYBER SECURITY PRODUCT UPGRADES (CSUP)		
	The ability of on-site service staff, remote service staff, or authorized customer staff to install/upgrade device's security patches.		
CSUP-1	Does the device contain any software or firmware which may require security updates during its operational life, either from the device manufacturer or from a third-party manufacturer of the software/firmware? If no, answer "N/A" to auestions in this section.	Yes	_
CSUP-2	Does the device contain an Operating System? If yes, complete 2.1-2.4.	Yes	RTOS VxWorks 5.5
CSUP-2.1	Does the device documentation provide instructions for owner/operator installation of patches or software updates?	No	-
CSUP-2.2	Does the device require vendor or vendor-authorized service to install patches or software updates?	Yes	-
CSUP-2.3	Does the device have the capability to receive remote installation of patches or software updates?	No	-
CSUP-2.4	Does the medical device manufacturer allow security updates from any third-party manufacturers (e.g., Microsoft) to be installed without approval from the manufacturer?	Νο	_
CSUP-3	Does the device contain Drivers and Firmware? If yes, complete 3.1-3.4.	Yes	-
CSUP-3.1	Does the device documentation provide instructions for owner/operator installation of patches or software updates?	No	-
CSUP-3.2	Does the device require vendor or vendor-authorized service to install patches or software updates?	Yes	-
CSUP-3.3	Does the device have the capability to receive remote installation of patches or software updates?	No	-
CSUP-3.4	Does the medical device manufacturer allow security updates from any third-party manufacturers (e.g., Microsoft) to be installed without approval from the manufacturer?	No	_
CSUP-4	Does the device contain Anti-Malware Software? If yes, complete 4.1-4.4.	No	_
CSUP-4.1	Does the device documentation provide instructions for owner/operator installation of patches or software updates?	N/A	-
CSUP-4.2	Does the device require vendor or vendor-authorized service to install patches or software updates?	N/A	-
CSUP-4.3	Does the device have the capability to receive remote installation of patches or software updates?	N/A	-

CSUP-4.4

CSUP-5

CSUP-5.1

Does the medical device manufacturer allow security N/A updates from any third-party manufacturers (e.g., Microsoft) to be installed without approval from the

Does the device documentation provide instructions N/A

No

Does the device contain Non-Operating System

commercial off-the-shelf components? If yes,

for owner/operator installation of patches or

manufacturer?

complete 5.1-5.4.

software updates?

Spacelabs Healthcare 92518

091-0233-01_Rev_A 25-Oct-2023

CSUP-5.2	Does the device require vendor or vendor-authorized service to install patches or software updates?	N/A
CSUP-5.3	Does the device have the capability to receive	N/A
	remote installation of patches or software updates?	
CSUP-5.4	Does the medical device manufacturer allow security	N/A
	updates from any third-party manufacturers (e.g.,	
	Microsoft) to be installed without approval from the	
	manufacturer?	
CSUP-6	Does the device contain other software components	No
	(e.g., asset management software, license	
	management)? If yes, please provide details or	
	refernce in notes and complete 6.1-6.4.	
CSUP-6.1	Does the device documentation provide instructions	N/A
	for owner/operator installation of patches or	
	software updates?	
CSUP-6.2	Does the device require vendor or vendor-authorized	N/A
	service to install patches or software updates?	
CSUP-6.3	Does the device have the capability to receive	N/A
	remote installation of patches or software updates?	
CSUP-6.4	Does the medical device manufacturer allow security	N/A
	updates from any third-party manufacturers (e.g.,	
	Microsoft) to be installed without approval from the	
	manufacturer?	
CSUP-7	Does the manufacturer notify the customer when	Yes Communications for product updates, such a
	updates are approved for installation?	Customer Service Notices or Product Update
		Bulletins, are distributed to Spacelabs custo
		service personnel to communicate these up
		customers directly.
CSUP-8	Does the device perform automatic installation of software updates?	No
CSUP-9	Does the manufacturer have an approved list of third	N/A
	party software that can be installed on the device?	
	. ,	
CSUP-10	Can the owner/operator install manufacturer-	N/A
	approved third-party software on the device	
	themselves?	
CSUP-10.1	Does the system have mechanism in place to prevent	N/A
	installation of unapproved software?	
CSUP-11	Does the manufacturer have a process in place to	No
	assess device vulnerabilities and updates?	
CSUP-11.1	Does the manufacturer provide customers with	No
	review and approval status of updates?	
CSUP-11.2	Is there an update review cycle for the device?	No

HEALTH DATA DE-IDENTIFICATION (DIDT)

	The ability of the device to directly remove		
	information that allows identification of a person.		
DIDT-1	Does the device provide an integral capability to de-	N/A	
	identify personally identifiable information?		
DIDT-1.1	Does the device support de-identification profiles	N/A	
	that comply with the DICOM standard for de-		
	identification?		
	DATA BACKUP AND DISASTER RECOVERY (DTBK)	1	

	The ability to recover after damage or destruction of device data, hardware, software, or site configuration information.	
DTBK-1	Does the device maintain long term primary storage	No
	of personally identifiable information / patient	
	information (e.g. PACS)?	
DTBK-2	Does the device have a "factory reset" function to	Yes
	restore the original device settings as provided by	
	the manufacturer?	
DTBK-3	Does the device have an integral data backup	No
	capability to removable media?	

Spacelabs Realtricare	32310	091-0253-01_Rev_A	25-001-2025
DTBK-4	Does the device have an integral data backup	No	
	capability to remote storage?	No	
DTBK-5	Does the device have a backup capability for system configuration information, patch restoration, and	No	
	software restoration?		
DTBK-6		N/A	
	integrity and authenticity of a backup?		
	EMERGENCY ACCESS (EMRG)		
	The ability of the device user to access personally		
	identifiable information in case of a medical emergency situation that requires immediate access		
	to stored personally identifiable information.		
EMRG-1	Does the device incorporate an emergency access	No	_
	(i.e. "break-glass") feature?		
	HEALTH DATA INTEGRITY AND AUTHENTICITY		
	(IGAU)		
	How the device ensures that the stored data on the		
	device has not been altered or destroyed in a non-		
	authorized manner and is from the originator.	N/0	
IGAU-1	Does the device provide data integrity checking mechanisms of stored health data (e.g., hash or	N/A	—
	digital signature)?		
IGAU-2	Does the device provide error/failure protection and	N/A	_
	recovery mechanisms for stored health data (e.g.,		
	RAID-5)?		
	MALWARE DETECTION/PROTECTION (MLDP)		
	The ability of the device to effectively prevent, detect		
	and remove malicious software (malware).		
MLDP-1	Is the device capable of hosting executable software?	No	
MLDP-2	Does the device support the use of anti-malware	N/A	-
	software (or other anti-malware mechanism)? Provide details or reference in notes.		
MLDP-2.1	Does the device include anti-malware software by	N/A	
	default?		_
MLDP-2.2	Does the device have anti-malware software	N/A	_
	available as an option?	N/A	
MLDP-2.3	Does the device documentation allow the owner/operator to install or update anti-malware	N/A	—
	software?		
MLDP-2.4	Can the device owner/operator independently (re-	N/A	
)configure anti-malware settings?		
MLDP-2.5	Does notification of malware detection occur in the	N/A	
MLDP-2.6	device user interface? Can only manufacturer-authorized persons repair	N/A	
WILDI 2.0	systems when malware has been detected?		
MLDP-2.7	Are malware notifications written to a log?	N/A	
MLDP-2.8	Are there any restrictions on anti-malware (e.g.,	N/A	
	purchase, installation, configuration, scheduling)?	N/4	
MLDP-3	If the answer to MLDP-2 is NO, and anti-malware	N/A	—
	cannot be installed on the device, are other compensating controls in place or available?		
MLDP-4	Does the device employ application whitelisting that	N/A	
	restricts the software and services that are permitted		
	to be run on the device?		
MLDP-5	Does the device employ a host-based intrusion	N/A	-
MLDP-5.1	detection/prevention system? Can the host-based intrusion detection/prevention	N/A	
	system be configured by the customer?		-
MLDP-5.2	Can a host-based intrusion detection/prevention	N/A	_
	system be installed by the customer?		

25-Oct-2023

NODE AUTHENTICATION (NAUT)

Spacelabs Healthcare 92518

The ability of the device to authenticate communication partners/nodes.

Spacelabs Healthcare	92518	091-0233-01_Rev_A	25-Oct-2023
NAUT-1	Does the device provide/support any means of node authentication that assures both the sender and the recipient of data are known to each other and are authorized to receive transferred information (e.g. Web APIs, SMTP, SNMP)?	N/A	_
NAUT-2	Are network access control mechanisms supported (E.g., does the device have an internal firewall, or use a network connection white list)?	N/A	_
NAUT-2.1	Is the firewall ruleset documented and available for review?	N/A	-
NAUT-3	Does the device use certificate-based network connection authentication?	N/A	-
	CONNECTIVITY CAPABILITIES (CONN)		
	All network and removable media connections must be considered in determining appropriate security controls. This section lists connectivity capabilities that may be present on the device.		
CONN-1	Does the device have hardware connectivity capabilities?	Yes	-
CONN-1.1	Does the device support wireless connections?	No	
CONN-1.1.1	Does the device support Wi-Fi?	No	
CONN-1.1.2	Does the device support Bluetooth?	No	
CONN-1.1.3	Does the device support other wireless network	No	
	connectivity (e.g. LTE, Zigbee, proprietary)?		
CONN-1.1.4	Does the device support other wireless connections (e.g., custom RF controls, wireless detectors)?	No	-
CONN-1.2	Does the device support physical connections?	Yes	
CONN-1.2.1	Does the device have available RJ45 Ethernet ports?	No	-
CONN-1.2.2	Does the device have available USB ports?	No	
CONN-1.2.3	Does the device require, use, or support removable memory devices?	No	-
CONN-1.2.4	Does the device support other physical connectivity?	Yes	This device connects directly to a bedside monitor (Xprezzon, Qube, Qube Mini) via a specially
			designed port. It sends data about the patient
CONN-2	Does the manufacturer provide a list of network ports and protocols that are used or may be used on the device?	N/A	
CONN-2 CONN-3		N/A No	designed port. It sends data about the patient
	ports and protocols that are used or may be used on the device? Can the device communicate with other systems within the customer environment? Can the device communicate with other systems external to the customer environment (e.g., a service	No	designed port. It sends data about the patient
CONN-3 CONN-4	ports and protocols that are used or may be used on the device? Can the device communicate with other systems within the customer environment? Can the device communicate with other systems external to the customer environment (e.g., a service host)?	No	designed port. It sends data about the patient
CONN-3 CONN-4 CONN-5	ports and protocols that are used or may be used on the device? Can the device communicate with other systems within the customer environment? Can the device communicate with other systems external to the customer environment (e.g., a service host)? Does the device make or receive API calls?	No No	designed port. It sends data about the patient
CONN-3 CONN-4	ports and protocols that are used or may be used on the device? Can the device communicate with other systems within the customer environment? Can the device communicate with other systems external to the customer environment (e.g., a service host)? Does the device make or receive API calls? Does the device require an internet connection for	No	designed port. It sends data about the patient
CONN-3 CONN-4 CONN-5	ports and protocols that are used or may be used on the device? Can the device communicate with other systems within the customer environment? Can the device communicate with other systems external to the customer environment (e.g., a service host)? Does the device make or receive API calls?	No No	designed port. It sends data about the patient
CONN-3 CONN-4 CONN-5 CONN-6	ports and protocols that are used or may be used on the device? Can the device communicate with other systems within the customer environment? Can the device communicate with other systems external to the customer environment (e.g., a service host)? Does the device make or receive API calls? Does the device require an internet connection for its intended use? Does the device support Transport Layer Security	No No No	designed port. It sends data about the patient
CONN-3 CONN-4 CONN-5 CONN-6 CONN-7	ports and protocols that are used or may be used on the device? Can the device communicate with other systems within the customer environment? Can the device communicate with other systems external to the customer environment (e.g., a service host)? Does the device make or receive API calls? Does the device require an internet connection for its intended use? Does the device support Transport Layer Security (TLS)?	No No No	designed port. It sends data about the patient
CONN-3 CONN-4 CONN-5 CONN-6 CONN-7 CONN-7.1	ports and protocols that are used or may be used on the device? Can the device communicate with other systems within the customer environment? Can the device communicate with other systems external to the customer environment (e.g., a service host)? Does the device make or receive API calls? Does the device require an internet connection for its intended use? Does the device support Transport Layer Security (TLS)? Is TLS configurable? Does the device provide operator control functionality from a separate device (e.g., telemedicine)?	No No No No N/A	designed port. It sends data about the patient
CONN-3 CONN-4 CONN-5 CONN-6 CONN-7 CONN-7.1	ports and protocols that are used or may be used on the device? Can the device communicate with other systems within the customer environment? Can the device communicate with other systems external to the customer environment (e.g., a service host)? Does the device make or receive API calls? Does the device require an internet connection for its intended use? Does the device support Transport Layer Security (TLS)? Is TLS configurable? Does the device provide operator control functionality from a separate device (e.g., telemedicine)? PERSON AUTHENTICATION (PAUT) The ability to configure the device to authenticate	No No No No N/A	designed port. It sends data about the patient
CONN-3 CONN-4 CONN-5 CONN-6 CONN-7 CONN-7.1 CONN-8	ports and protocols that are used or may be used on the device? Can the device communicate with other systems within the customer environment? Can the device communicate with other systems external to the customer environment (e.g., a service host)? Does the device make or receive API calls? Does the device require an internet connection for its intended use? Does the device support Transport Layer Security (TLS)? Is TLS configurable? Does the device provide operator control functionality from a separate device (e.g., telemedicine)? PERSON AUTHENTICATION (PAUT) The ability to configure the device to authenticate users.	No No No No N/A N/A	designed port. It sends data about the patient
CONN-3 CONN-4 CONN-5 CONN-6 CONN-7 CONN-7.1	ports and protocols that are used or may be used on the device? Can the device communicate with other systems within the customer environment? Can the device communicate with other systems external to the customer environment (e.g., a service host)? Does the device make or receive API calls? Does the device require an internet connection for its intended use? Does the device support Transport Layer Security (TLS)? Is TLS configurable? Does the device provide operator control functionality from a separate device (e.g., telemedicine)? PERSON AUTHENTICATION (PAUT) The ability to configure the device to authenticate	No No No No N/A N/A	designed port. It sends data about the patient
CONN-3 CONN-4 CONN-5 CONN-6 CONN-7 CONN-7.1 CONN-8	ports and protocols that are used or may be used on the device? Can the device communicate with other systems within the customer environment? Can the device communicate with other systems external to the customer environment (e.g., a service host)? Does the device make or receive API calls? Does the device require an internet connection for its intended use? Does the device support Transport Layer Security (TLS)? Is TLS configurable? Does the device provide operator control functionality from a separate device (e.g., telemedicine)? PERSON AUTHENTICATION (PAUT) The ability to configure the device to authenticate users. Does the device support and enforce unique IDs and passwords for all users and roles (including service accounts)?	No No No No N/A N/A	designed port. It sends data about the patient
CONN-3 CONN-4 CONN-5 CONN-6 CONN-7 CONN-7.1 CONN-8	ports and protocols that are used or may be used on the device? Can the device communicate with other systems within the customer environment? Can the device communicate with other systems external to the customer environment (e.g., a service host)? Does the device make or receive API calls? Does the device require an internet connection for its intended use? Does the device support Transport Layer Security (TLS)? Is TLS configurable? Does the device provide operator control functionality from a separate device (e.g., telemedicine)? PERSON AUTHENTICATION (PAUT) The ability to configure the device to authenticate users. Does the device support and enforce unique IDs and passwords for all users and roles (including service accounts)? Does the device enforce authentication of unique IDs and passwords for all users and roles (including service accounts)? Is the device configurable to authenticate users through an external authentication service (e.g., MS	No No No No N/A N/A	designed port. It sends data about the patient
CONN-3 CONN-4 CONN-5 CONN-6 CONN-7 CONN-7.1 CONN-8 PAUT-1 PAUT-1.1	ports and protocols that are used or may be used on the device? Can the device communicate with other systems within the customer environment? Can the device communicate with other systems external to the customer environment (e.g., a service host)? Does the device make or receive API calls? Does the device require an internet connection for its intended use? Does the device support Transport Layer Security (TLS)? Is TLS configurable? Does the device provide operator control functionality from a separate device (e.g., telemedicine)? PERSON AUTHENTICATION (PAUT) The ability to configure the device to authenticate users. Does the device support and enforce unique IDs and passwords for all users and roles (including service accounts)? Does the device enforce authentication of unique IDs and passwords for all users and roles (including service accounts)? Is the device configurable to authenticate users	No No No No N/A N/A	designed port. It sends data about the patient

SBOM-2

SBOM-2.1

Spacelabs Healthcare	92518	091-0233-01_Rev_A	25-Oct-2023
PAUT-4	Are all default accounts (e.g., technician service accounts, administrator accounts) listed in the	N/A	-
	documentation?	21/2	
PAUT-5	Can all passwords be changed?	N/A	-
PAUT-6	Is the device configurable to enforce creation of user account passwords that meet established	N/A	-
PAUT-7	(organization specific) complexity rules? Does the device support account passwords that	N/A	
	expire periodically?		
PAUT-8	Does the device support multi-factor authentication?	N/A	_
PAUT-9	Does the device support single sign-on (SSO)?	N/A	
PAUT-10	Can user accounts be disabled/locked on the device?		_
PAUT-11	Does the device support biometric controls?	N/A	-
PAUT-12	Does the device support physical tokens (e.g. badge	N/A	_
PAUT-13	access)? Does the device support group authentication (e.g.	N/A	_
PAUT-14	hospital teams)? Does the application or device store or manage	N/A	
	authentication credentials?		_
PAUT-14.1	Are credentials stored using a secure method?	N/A	
	PHYSICAL LOCKS (PLOK)		
	Physical locks can prevent unauthorized users with		
	physical access to the device from compromising the		
	integrity and confidentiality of personally identifiable		
	information stored on the device or on removable		
	media (in the second		
PLOK-1	Is the device software only? If yes, answer "N/A" to	No	
	remaining questions in this section.		
PLOK-2	Are all device components maintaining personally	N/A	-
	identifiable information (other than removable		
	media) physically secure (i.e., cannot remove without		
	tools)?	N1/A	
PLOK-3	Are all device components maintaining personally	N/A	—
	identifiable information (other than removable		
	media) physically secured behind an individually keyed locking device?		
PLOK-4	Does the device have an option for the customer to	N/A	
	attach a physical lock to restrict access to removable		<u> </u>
	media?		
	ROADMAP FOR THIRD PARTY COMPONENTS IN		
	DEVICE LIFE CYCLE (RDMP)		
	Manufacturer's plans for security support of third-		
	party components within the device's life cycle.		
RDMP-1	Was a secure software development process, such as	Yes	Spacelabs follows IEC 62304 software development
	ISO/IEC 27034 or IEC 62304, followed during product		process for development of Spacelabs medical
	development?		software and software within the Spacelabs medical
		No.	devices.
RDMP-2	Does the manufacturer evaluate third-party applications and software components included in	Yes	—
	applications and software components included in the device for secure development practices?		
RDMP-3	Does the manufacturer maintain a web page or	Yes	
	other source of information on software support	103	-
	dates and updates?		
RDMP-4	Does the manufacturer have a plan for managing	Yes	
	third-party component end-of-life?		_
	SOFTWARE BILL OF MATERIALS (SBoM)		
	A Software Bill of Material (SBoM) lists all the		
	software components that are incorporated into the		
	device being described for the purpose of		
	operational security planning by the healthcare		
	delivery organization. This section supports controls		
	in the RDMP section.		
SBOM-1	Is the SBoM for this product available?	No	_
SBOM-2	Does the SBoM follow a standard or common	N/A	

SBOM-2.2	Are the developers/manufacturers of the software components identified?	N/A	
SBOM-2.3	Are the major version numbers of the software	N/A	
SBOM-2.4	components identified? Are any additional descriptive elements identified?	N/A	
SBOM-2.4 SBOM-3	Does the device include a command or process	N/A N/A	_
	method available to generate a list of software		
SBOM-4	components installed on the device? Is there an update process for the SBoM?	N/A	
	SYSTEM AND APPLICATION HARDENING (SAHD)		
	The device's inherent resistance to cyber attacks and		
SAHD-1	malware. Is the device hardened in accordance with any	No	
SAID-1	industry standards?		_
SAHD-2	Has the device received any cybersecurity	No	_
SAHD-3	certifications? Does the device employ any mechanisms for	Yes	_
	software integrity checking		
SAHD-3.1	Does the device employ any mechanism (e.g., release specific hash key, checksums, digital signature, etc.)	·Yes	—
	to ensure the installed software is manufacturer-		
SAHD-3.2	authorized? Does the device employ any mechanism (e.g., release	Yes	
	specific hash key, checksums, digital signature, etc.)		
	to ensure the software updates are the manufacturer-authorized updates?		
SAHD-4	Can the owner/operator perform software integrity	No	
	checks (i.e., verify that the system has not been modified or tampered with)?		
SAHD-5	Is the system configurable to allow the	N/A	_
	implementation of file-level, patient level, or other types of access controls?		
SAHD-5.1		N/A	_
SAHD-6	Are any system or user accounts restricted or	N/A	
5/112 0	disabled by the manufacturer at system delivery?		_
SAHD-6.1	Are any system or user accounts configurable by the end user after initial configuration?	N/A	-
SAHD-6.2	Does this include restricting certain system or user	N/A	
	accounts, such as service technicians, to least privileged access?		
SAHD-7	Are all shared resources (e.g., file shares) which are	Yes	
	not required for the intended use of the device disabled?		
SAHD-8	Are all communication ports and protocols that are	Yes	
	not required for the intended use of the device		
SAHD-9	disabled? Are all services (e.g., telnet, file transfer protocol	Yes	_
	[FTP], internet information server [IIS], etc.), which		
	are not required for the intended use of the device deleted/disabled?		
SAHD-10	Are all applications (COTS applications as well as OS-	Yes	_
	included applications, e.g., MS Internet Explorer, etc.) which are not required for the intended use of		
	the device deleted/disabled?		
SAHD-11	Can the device prohibit boot from uncontrolled or removable media (i.e., a source other than an	N/A	—
	internal drive or memory component)?		
SAHD-12	Can unauthorized software or hardware be installed on the device without the use of physical tools?	NO	—
SAHD-13	Does the product documentation include information on operational network security	N/A	—
	scanning by users?		
SAHD-14	Can the device be hardened beyond the default provided state?	N/A	—
SAHD-14.1	Are instructions available from vendor for increased	N/A	
SHAD-15	hardening? Can the system prevent access to BIOS or other	N/A	
	bootloaders during boot?		
SAHD-16	Have additional hardening methods not included in 2.3.19 been used to harden the device?	N/A	—
	ב.ס.בס טכנוו עסכע נט וומועכוו נווב עפעונפן

	SECURITY GUIDANCE (SGUD)		
	Availability of security guidance for operator and		
	administrator of the device and manufacturer sales		
SGUD-1	and service.	Voc	
3000-1	Does the device include security documentation for the owner/operator?	Yes	—
SGUD-2	Does the device have the capability, and provide	N/A	
	instructions, for the permanent deletion of data from		
SGUD-3	the device or media? Are all access accounts documented?	N/A	
5000 5		14/1	_
SGUD-3.1	Can the owner/operator manage password control	N/A	_
SGUD-4	for all accounts? Does the product include documentation on	N/A	
	recommended compensating controls for the	14/1	_
	device?		
	HEALTH DATA STORAGE CONFIDENTIALITY		
	(STCF)		
	The ability of the device to ensure unauthorized access does not compromise the integrity and		
	confidentiality of personally identifiable information		
	stored on the device or removable media.		
STCF-1	Can the device encrypt data at rest?	No	
STCF-1.1	Is all data encrypted or otherwise protected?	N/A	
STCF-1.2	Is the data encryption capability configured by default?	N/A	
STCF-1.3	Are instructions available to the customer to	N/A	
STCF-2	configure encryption? Can the encryption keys be changed or configured?	N/A	
5101 2		14/1	_
STCF-3	Is the data stored in a database located on the	N/A	_
STCF-4	device? Is the data stored in a database external to the	N/A	
	device?	,	
	TRANSMISSION CONFIDENTIALITY (TXCF)		
	The ability of the device to ensure the confidentiality		
	of transmitted personally identifiable information.		
TXCF-1	Can personally identifiable information be	N/A	
	transmitted only via a point-to-point dedicated	.,	—
T /05 0	cable?		
TXCF-2	Is personally identifiable information encrypted prior to transmission via a network or removable media?	N/A	-
TXCF-2.1	If data is not encrypted by default, can the customer	N/A	_
TXCF-3	configure encryption options? Is personally identifiable information transmission	N/A	
-	restricted to a fixed list of network destinations?		
TXCF-4	Are connections limited to authenticated systems?	N/A	-
TXCF-5	Are secure transmission methods supported/implemented (DICOM, HL7, IEEE 11073)?	N/A	—
	TRANSMISSION INTEGRITY (TXIG)		
	The ability of the device to ensure the integrity of		
	transmitted data.		
TXIG-1	Does the device support any mechanism (e.g., digital signatures) intended to ensure data is not modified	N/A	—
	during transmission?		
TXIG-2	Does the device include multiple sub-components	N/A	_

REMOTE SERVICE (RMOT)

connected by external cables?

25-Oct-2023

	Remote service refers to all kinds of device maintenance activities performed by a service person via network or other remote connection.	
RMOT-1	Does the device permit remote service connections for device analysis or repair?	No
RMOT-1.1	Does the device allow the owner/operator to initiative remote service sessions for device analysis or repair?	N/A
RMOT-1.2	Is there an indicator for an enabled and active remote session?	N/A
RMOT-1.3	Can patient data be accessed or viewed from the device during the remote session?	N/A
RMOT-2	Does the device permit or use remote service connections for predictive maintenance data?	N/A
RMOT-3	Does the device have any other remotely accessible functionality (e.g. software updates, remote training)?	No

OTHER SECURITY CONSIDERATIONS (OTHR)

Notes:

Note 1
