NomoLine Sampling Lines

NomoLine technology eliminates common problems associated with conventional sidestream gas analysis. Designed for low-flow applications, with functionality in any orientation, NomoLine sampling lines can be used in a variety of clinical scenarios on both intubated and non-intubated adult, pediatric, infant, and neonatal patients, in both low- and high-humidity configurations. These are designed for use with Spacelabs Capnography and Multi-Gas Modules 92516, 92517 and 92518.
