IEC COLOR CODING

ECG Combiner Lead Wires & Cables

Our ECG Combiner System of lead wires, cables and adapters allows you to standardize ECG supplies across monitoring brands. The system features a universal connection between cables and lead wires which allows a quick connect/disconnect between monitors and telemetry, and single patient multiple use lead wire options. System is validated for use with Spacelabs command modules 90496/91496 and Aria/Ultraview Telemetry.

ECG Combiner System – Easy 2-step transition from bedside to telemetry

Step 1: disconnect leadset from monitor cable

Step 2: connect leadset to telemetry adapter

Note: leadset and adapter are keyed and color-coded to help prevent misconnections

Order Code	Description		Length	Qty
ECG Combiner Lead Wire Sets - requires ECG Combiner Cable or Adapter				
Disposable, DIN Shielded, Multi-Pinch, IEC				
700-0006-44	5 Lead	Multi-Pinch	127cm /50 in	25 Sets

DIN Unshielded Lead Wires & Telemetry

TruLink ECG Din unshielded reusable lead wires are validated for use with Spacelabs telemetry systems. They are available in 3 and 5-lead sets, or available to purchase individually in color-coded multi-packs. They can be ordered with a snap or pinch electrode interface. A grouper adapter is also available to help manage leads for a quick connection to the transmitter. Validated for use with models 90341, 90343, 90347, 91341, 91343, 91347 and 96281.
