Pressure Infusors

Unifusor® Pressure Infusors

Unifusor Pressure Infusors are available in 3 Models: Unifusor Disposable, Unifusor II & Unifusor Plus Reusable. All models are available in 500, 1000 and 3,000 mL sizes. The Unifusors are 100% tested for leakage during the manufacturing process. Unifusor pressure Infusors include an IV pole loop, a fluid bag hood and a reinforced translucent sleeve which enables easy viewing of fluid type and level. This unit is designed for rapid IV infusion, invasive pressure monitoring and auto-transfusion procedures.

Unifusor® Pressure Infusors

Unifusor Pressure Infusors are available in 3 Models: Unifusor Disposable, Unifusor II & Unifusor Plus Reusable. All models are available in 500, 1000 and 3,000 mL sizes. The Unifusors are 100% tested for leakage during the manufacturing process. Unifusor pressure Infusors include an IV pole loop, a fluid bag hood and a reinforced translucent sleeve which enables easy viewing of fluid type and level. This unit is designed for rapid IV infusion, invasive pressure monitoring and auto-transfusion procedures.

ECG Combiner Lead Wires & Cables

ECG COMBINER LEAD WIRE SYSTEM
AAMI Color Coded

Our ECG Combiner System of lead wires, cables and adapters allows you to standardize ECG supplies across monitoring brands. The system features a universal connection between cables and lead wires which allows a quick connect/disconnect between monitors and telemetry, and single patient multiple use lead wire options. System is validated for use with Spacelabs command modules 90496/91496 and Aria/Ultraview Telemetry.

ECG Lead Wire & Cables - Shielded

TruLink ECG lead wires are designed and validated for use with Spacelabs monitoring systems. Ten foot reusable monitor cables are available in 3, 5, or 10 lead configurations. The reusable shielded TruLink lead wires feature individual color-coded leads with a 2-prong connection into the monitor cable. They are available in a variety of lengths with either a snap or pinch electrode interface. For use with Spacelabs command modules 90496/91496.

Capnography & Multigas

NomoLine Sampling Lines

NomoLine technology eliminates common problems associated with conventional sidestream gas analysis. Designed for low-flow applications, with functionality in any orientation, NomoLine sampling lines can be used in a variety of clinical scenarios on both intubated and non-intubated adult, pediatric, infant, and neonatal patients, in both low- and high-humidity configurations. These are designed for use with Spacelabs Capnography and Multi-Gas Modules 92516, 92517 and 92518.

NomoLine Sampling Lines

NomoLine technology eliminates common problems associated with conventional sidestream gas analysis. Designed for low-flow applications, with functionality in any orientation, NomoLine sampling lines can be used in a variety of clinical scenarios on both intubated and non-intubated adult, pediatric, infant, and neonatal patients, in both low- and high-humidity configurations. These are designed for use with Spacelabs Capnography and Multi-Gas Modules 92516, 92517 and 92518.

Capnography & Multigas

Spacelabs carries a variety of TruLink and brand name capnography supplies that have been validated for use with Spacelabs modules. For Sidestream and Mainstream monitoring, we offer a variety of low-cost but high-function adapters, cannula, sampling lines, sensors, and airway T-adapters.

Capno Pod (92516) | Capnography Module (92517) | Multi-Gas Module (92518)

Sidestream Monitoring Supplies

<u>Please note</u>: the NomoLine multi-patient-use adapter has been discontinued. Without this adatper there is no means to connect the below sidestream supplies to our capnography modules. We do, however, make these supplies available for order for those customers who have remaining supply of the adapter, or use these for other applications.

Cardiac Output Supplies

A variety of supplies are available through Spacelabs for 90496/91496 modules configured for cardiac output. These supplies facilitate the thermodilution method. Spacelabs offers adapters, cables, reference and inline injectate probes and kits compatible with BD or Edwards Lifesciences injectate probes and most models of thermodilution catheters.

SUPPLIES & ACCESSORIES

Ultraview DM3

DUAL MODE VITAL SIGNS MONITOR

Vital Sign Monitoring

Ultraview DM3 supports measurement of SpO2, pulse rate, NIBP and temperature, and can be used in any patient care environment where basic vital signs monitoring is needed.
See previous sections for NIBP and SpO2 supplies:
- The DM3 uses the TruLink NIBP cuffs (single tube, bayonet fitting) and the standard air hose 714-0018-00.
- The DM3 used the same cables and sensors, by brand, for pulse oximetry.

SUPPLIES & ACCESSORIES

Elance

VITAL SIGNS MONITOR

Elance Vital Signs Monitor

The élance family of integrated monitors offers you high-performance monitoring of essential parameters including ECG (3- and 5-lead), respiration, noninvasive blood pressure, peripheral O2 saturation and two temperatures. The “i” models add two channels of invasive blood pressure, and the “c” models add Microstream end tidal CO2.

Most TruLink supplies work with the Elance monitor:

- TruLink NIBP cuffs and hoses are compatible
- SpO2 sensors are compatible with same brand cable below
- TruLink ECG cables and leadwire systems are compatible

SUPPLIES & ACCESSORIES

Eclipse Mini and Eclipse Pro

Eclipse Pro and Mini Holter

Eclipse Pro is your versatile choice for screening, arrhythmia, pacemaker detection. A comfortable hook-up means your patient is more likely to be able to tolerate the recording for the desired length of time, and also avoid artifact and lead-off challenges. Eclipse Pro is available with 3, 4 or 10 lead options as well as a wearable patch. The Eclipse Mini is patch only.

Note: Patches may not be available in all regions at this time.

Eclipse Pro and Mini Holter

Eclipse Pro is your versatile choice for screening, arrhythmia, pacemaker detection. A comfortable hook-up means your patient is more likely to be able to tolerate the recording for the desired length of time, and also avoid artifact and lead-off challenges. Eclipse Pro is available with 3, 4 or 10 lead options as well as a wearable patch. The Eclipse Mini is patch only.

Note: Patches may not be available in all regions at this time.

Resting ECG

CardioExpress resting ECG
CardioDirect resting ECG

CardioExpress SL6A, SL12A and SL18A provide fast and accurate 12-lead ECG acquisition. Advanced design and ergonomics enable the operator to quickly and easily control the unit to meet individual requirements. They provide storage direct to the units and connectivity via Sentinel, Cardiology Information Management System (CIMS).
